Prerequisites Before Whatsapp Integration.

## 1. WhatsApp Number Requirements

# Integrate Brand New or Existing Number

## - Choice of Number:

Brand New or Existing Number can be used. Any Number can be integrated with Jwero.

Whichever number you are planning to integrate you have take entire chat + creative + important messages backup.

You also have to ensure that Whatsapp Account must be deleted for the number which you plan to integrate.

Learn More >> [How to Delete Whatsapp Account?](#)

## - Backup and Deletion:

You can take screenshots, save your contacts and save any important information regarding the customer in your CRM Notes.

This was you can always refer back to their details.

Please ensure to save any important information prior to Deletion of your Whatsapp Account

## - Fresh Start with WhatsApp API:

❗ **Please Note, Once Whatsapp API account is set up.**

**All your chats will be visible in Jwero Chatsapp and not in your Normal Whatsapp App as Whatsapp API can be used only with a communication Medium.**

**You will be able to add your Team Members and give them easy access for proper communication with your customers.**

## - Integration with Jwero:

Once the above is checked you are ready For Integration Process.

Detail how, once integrated, all messages will be sent and received via Jwero Web or the Jwero Chats App on Android and iOS.

# Migrate Via Existing Whatsapp Business API

## - Choice of Number:

As you have already used a Number for whatsapp in your previoud Whatsapp Business API and you are planning to migrate the same number with Jwero.

You can Follow below Steps to continue Further:

**- Disable 2 Step verification:**

To successfully Migrate from your previous Whatsapp Business API. You have to disable 2FA from your Whatsapp Business Manager.

Learn How >> [Disable 2 Step Verification for Whatsapp Business Manager.](#)

**- Be ready with WABA ID:**

Learn How >> [Find My WABA ID](#)

**- Integration with Jwero:**

Once the above is checked you are ready For Integration Process.

Detail how, once integrated, all messages will be sent and received via Jwero Web or the Jwero Chats App on Android and iOS.

## 2. Payment Method Requirements

Once Whatsapp is integrated successfully it will be required to Add a Payment Method for Whatsapp Business Manager for sending any messages or Broadcast with customers.

Follow this to [Add Payment Method for your Whatsapp Business Manager.](#)

## 3. Verified Facebook Business Manager

A Business Manager account links your business and its assets to the WhatsApp API. If this account is verified, you can start with a limit of sending 250 WhatsApp Conversation per 24-Hour rolling period, which can increase to 1,000 and then to 10,000 Conversations per 24 hr rolling period and potentially more. If the account is not verified, your message sending limit is capped at 250 messages per day.

Follow this to [Verify your Facebook Business Manager Account.](#)
