

# Text Block Element

This guide provides detailed instructions on Text Block elements from selecting fonts to adjusting layout, follow the precise steps to enhance the design and functionality of your website.

**Go to [app.jwero.ai](https://app.jwero.ai)**

## 1. Click on "Frontend" to use the Text Block element.

Click on the specified button.

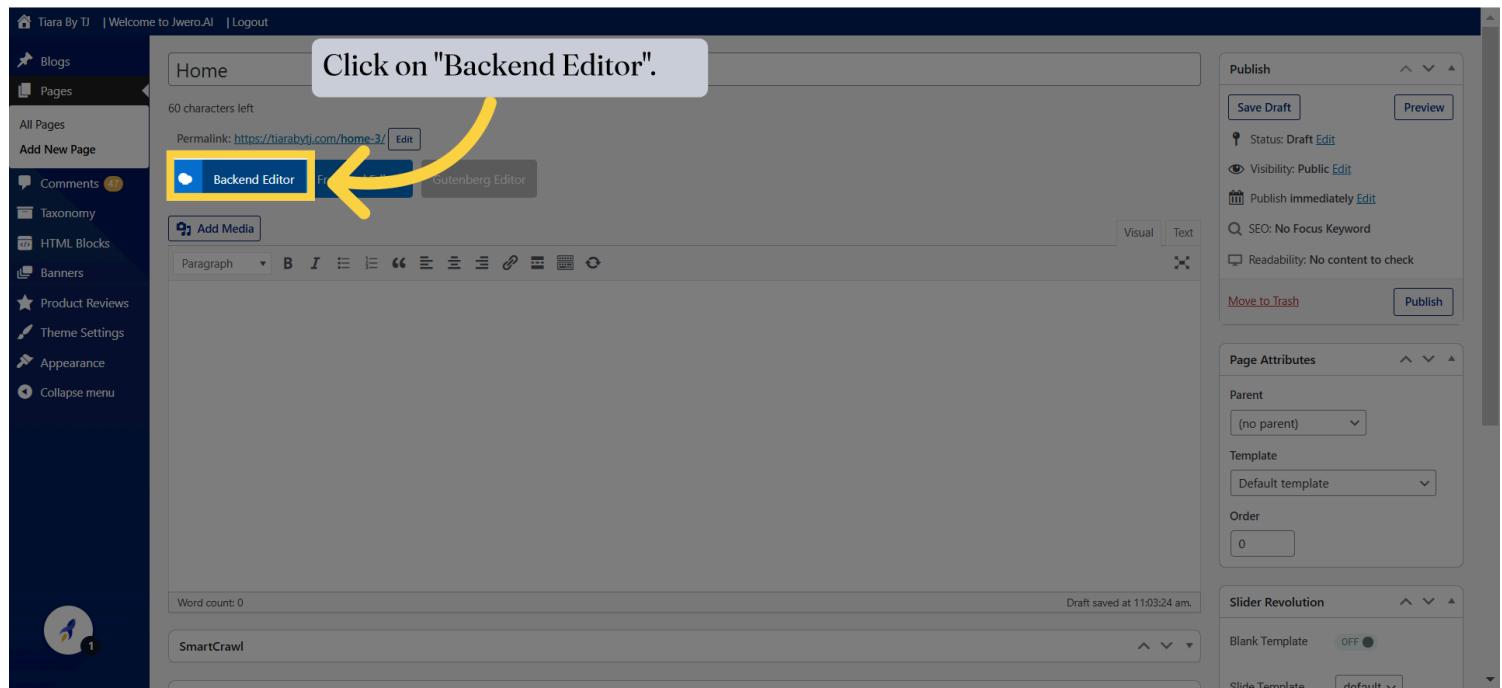

The screenshot shows the JWERO dashboard. On the left, there's a sidebar with icons for Digigold, Chats, Social, Marketing Automation, Integrations, Settings, and Activities. A yellow arrow points from the 'Activities' icon to a callout box. The main dashboard area has several cards: one for customer counts (12923), one for stock levels (4706), one for catalogs (469), and one for orders (682). A callout box with a yellow arrow points to the 'Frontend' button in the top right corner of the dashboard header. At the bottom right, there's a 'Live Visitors' section showing zero visitors.

## 2. Navigate to the page where you want to add the text block element.

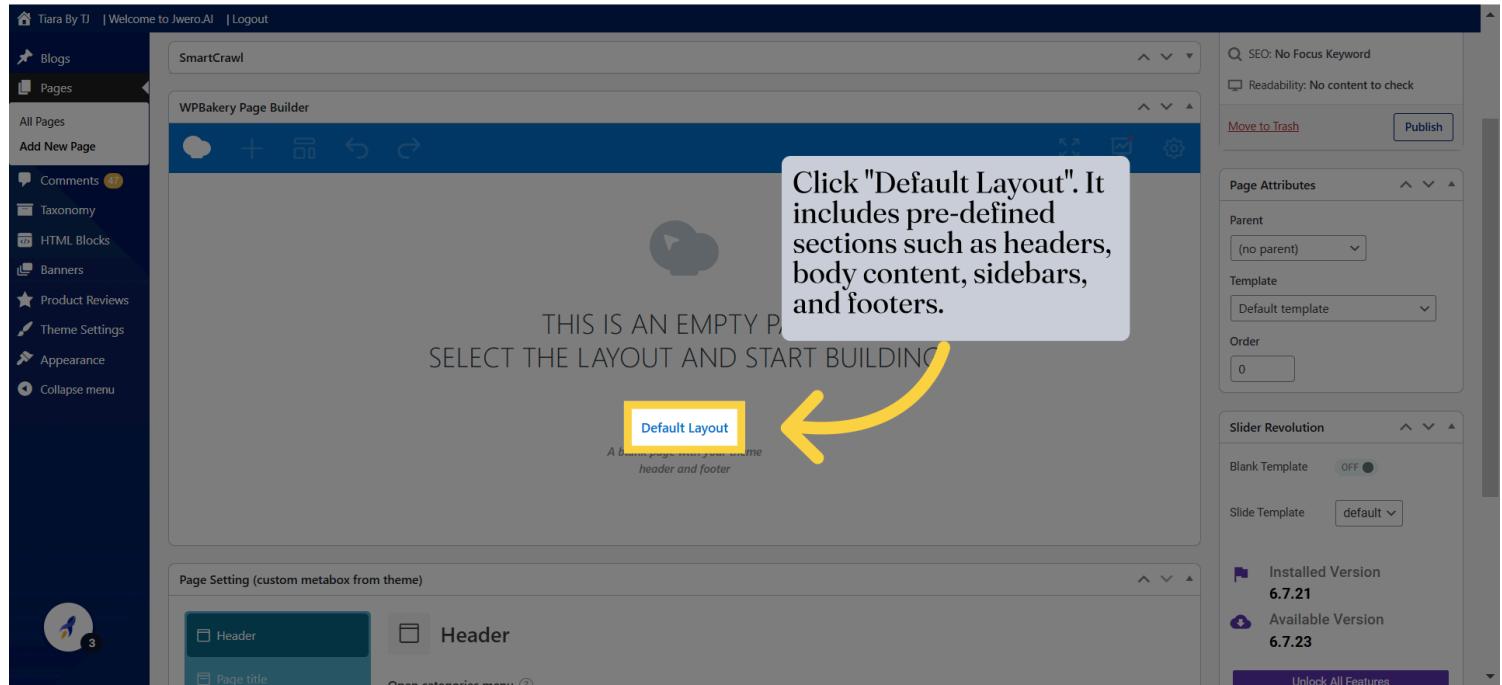

Navigate to **Pages** -> **All Pages**, locate the page where you want to add the Text Block, and click **Edit**.

The screenshot shows the WordPress Backend Editor for a page titled 'Home'. A yellow arrow points from a callout box to the 'Frontend Editor' tab in the top navigation bar. The callout box contains the text: 'Navigate to the page where you want to add the text block element.' The right side of the screen shows the Publish panel with options like Save Draft, Preview, and Publish.

## 3. Click on "Backend Editor".

**4. Click "Default Layout". It includes pre-defined sections such as headers, body content, sidebars, and footers.**

**5. Click "Add element"**

## 7. Click on "+" to add the element.

Click on the specified location.

## 8. Search for "Text Block".

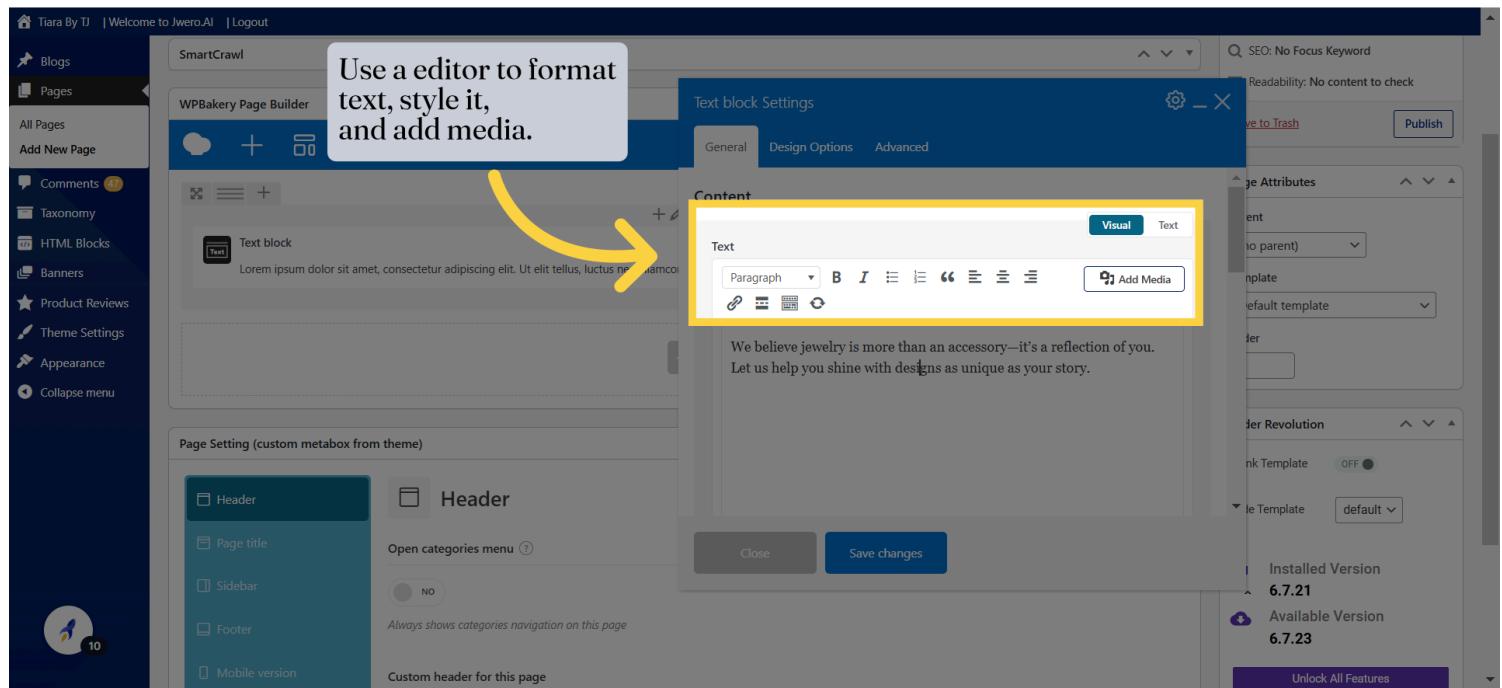

## 9. Click on "Text Block".

The screenshot shows the Jwero.AI Frontend Editor interface. On the left, there's a sidebar with various menu items like 'Blogs', 'Pages', 'Comments', etc. The main area has a toolbar with 'Classic Mode', 'Frontend Editor', and 'Gutenberg Editor'. Below that is a search bar and a 'Publish' button. The central part is the 'Add Element' panel, which lists several block types: 'Text Block', 'Separator with Text', 'Hover Box', 'Custom Heading', 'Marquee', and 'Promo Banner'. The 'Text Block' item is highlighted with a yellow box and a yellow arrow pointing to it from the bottom right. A callout bubble above the arrow says 'Click on "Text Block".' To the right of the add element panel are sections for 'Template' (set to 'Default template') and 'Slider Revolution' (status: 'Installed Version 6.7.21').

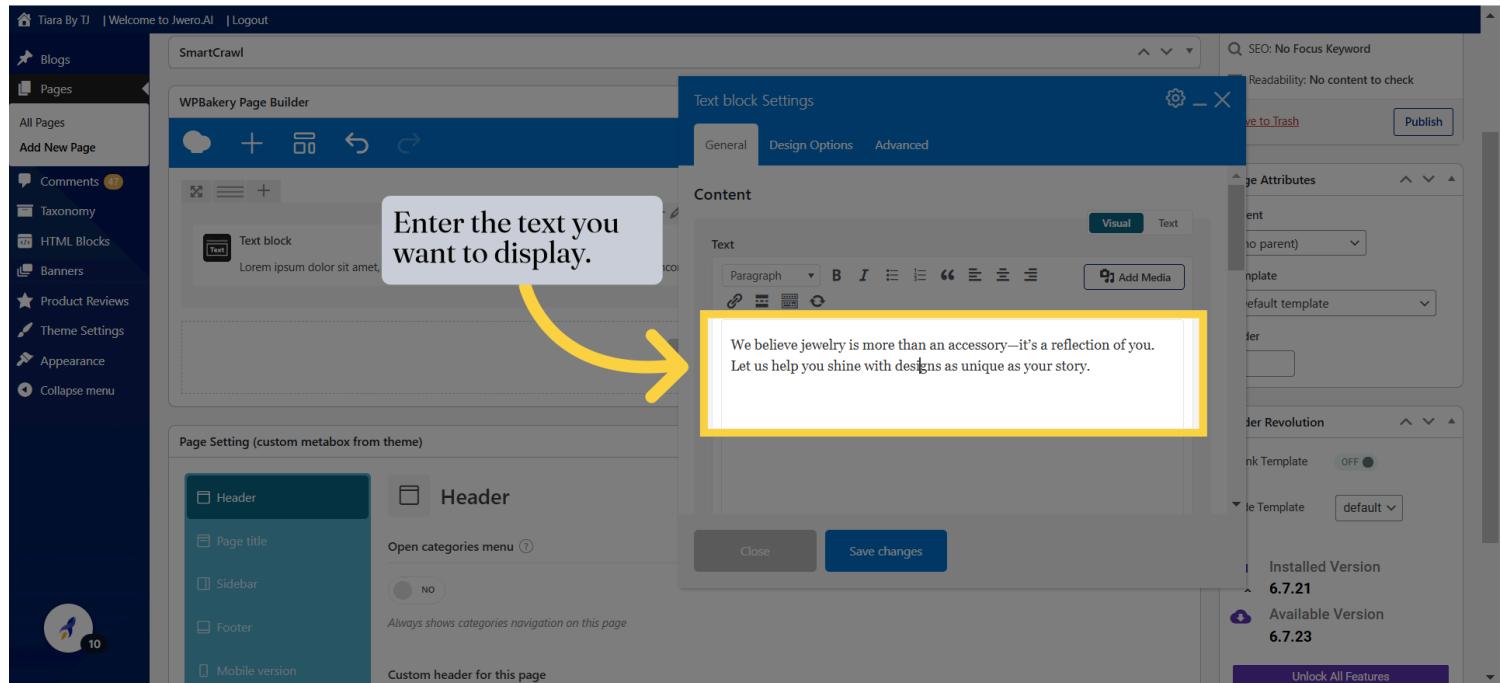

## 10. "Text Block Setting" window will be opened.

This screenshot shows the WPBakery Page Builder interface. On the left is a sidebar with 'SmartCrawl' and 'WPBakery Page Builder' sections. The main area shows a 'Text block' element with the placeholder 'Lorem ipsum'. A yellow arrow points from the bottom left towards a 'Text block Settings' window that is overlaid on the page builder. This window has a blue header 'Text block Settings' with tabs for 'General', 'Design Options', and 'Advanced'. The 'Content' tab is active, showing a rich text editor with the same 'Lorem ipsum' text. At the bottom of the window are 'Close' and 'Save changes' buttons. A callout bubble above the arrow says '\"Text Block Setting\" window will be opened.' To the right of the settings window are sections for 'Page Attributes' (set to 'Parent'), 'Slider Revolution' (status: 'Available Version 6.7.23'), and 'Unlock All Features'.

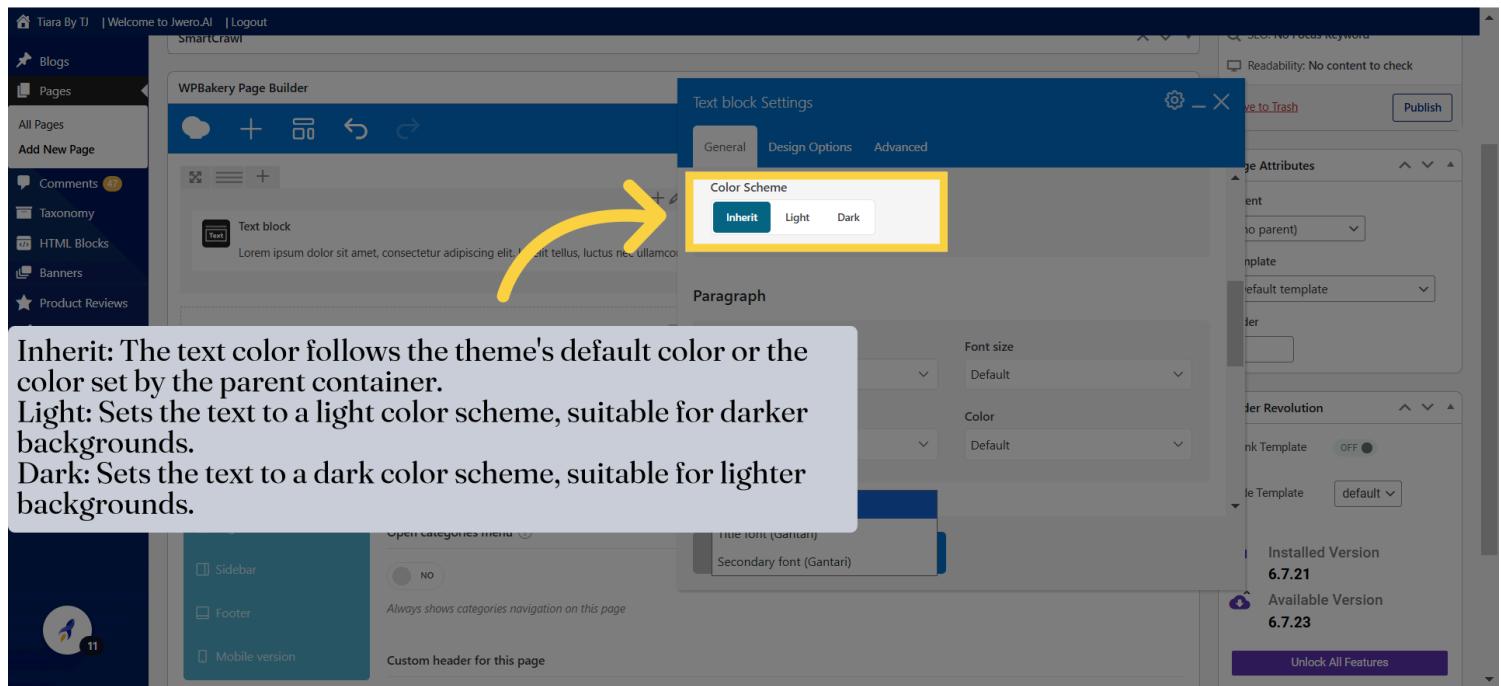

## 11. Use a editor to format text, style it, and add media.

## 12. Enter the text you want to display.

## 13. Inherit: The text color follows the theme's default color or the color set by the parent container. Light: Sets the text to a light color scheme, suitable for darker backgrounds. Dark: Sets the text to a dark color scheme, suitable for lighter backgrounds.

Light: Sets the text to a light color scheme, suitable for darker backgrounds.

Dark: Sets the text to a dark color scheme, suitable for lighter backgrounds.

## 14. Uses the theme's default font style. You can also choose a specific font from available font options.

Uses the theme's default font style. You can also choose a specific font from available font options.

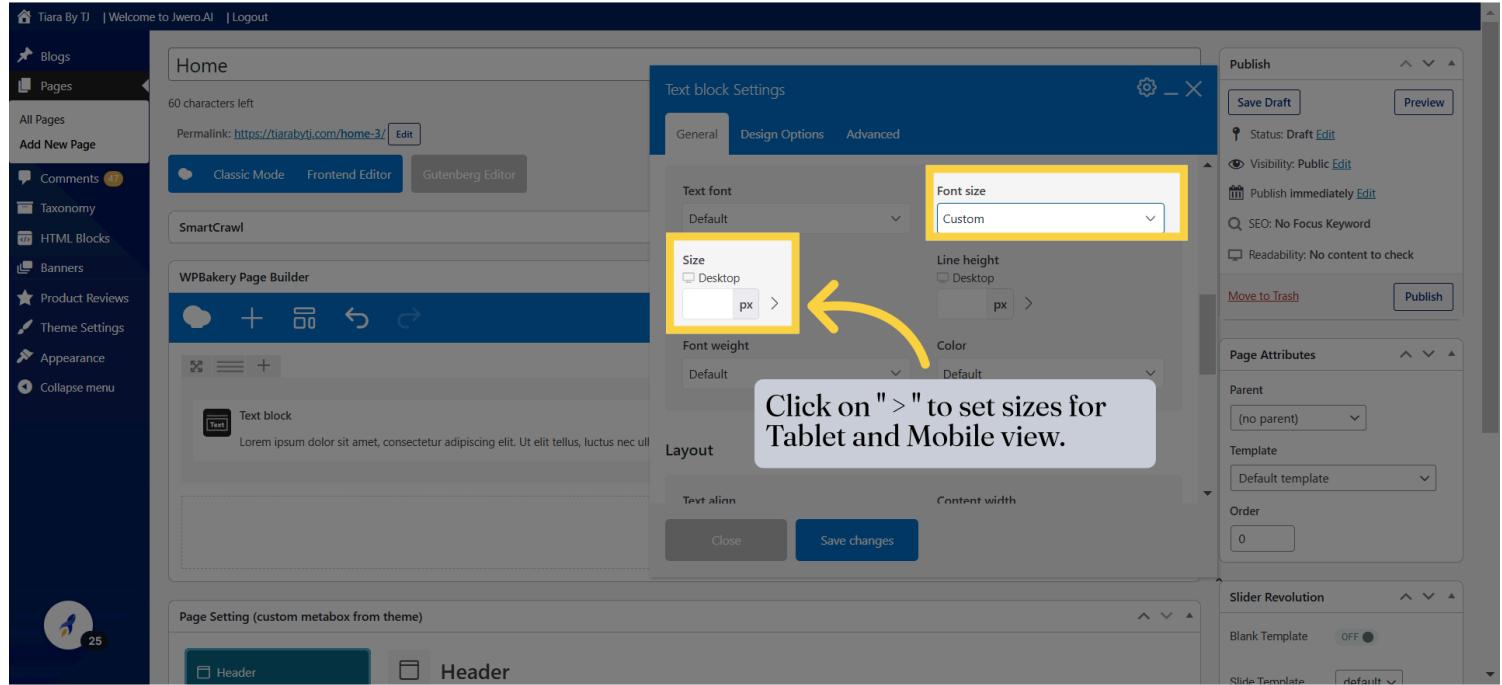

## 15. Enables you to specify a specific font size for text.

A screenshot of the WPBakery Page Builder interface. On the left, there's a sidebar with various menu items like 'Blogs', 'Pages', 'Comments', 'Appearance', etc. In the center, a 'Text block' is selected. A callout box with the text 'Enables you to specify a specific font size for text.' points to a dropdown menu labeled 'Font size'. This dropdown is highlighted with a yellow border and shows options: Default, Extra Small (14px), Small (16px), Medium (18px), Large (22px), Extra Large (26px), and XXL (36px). The 'Default' option is currently selected.

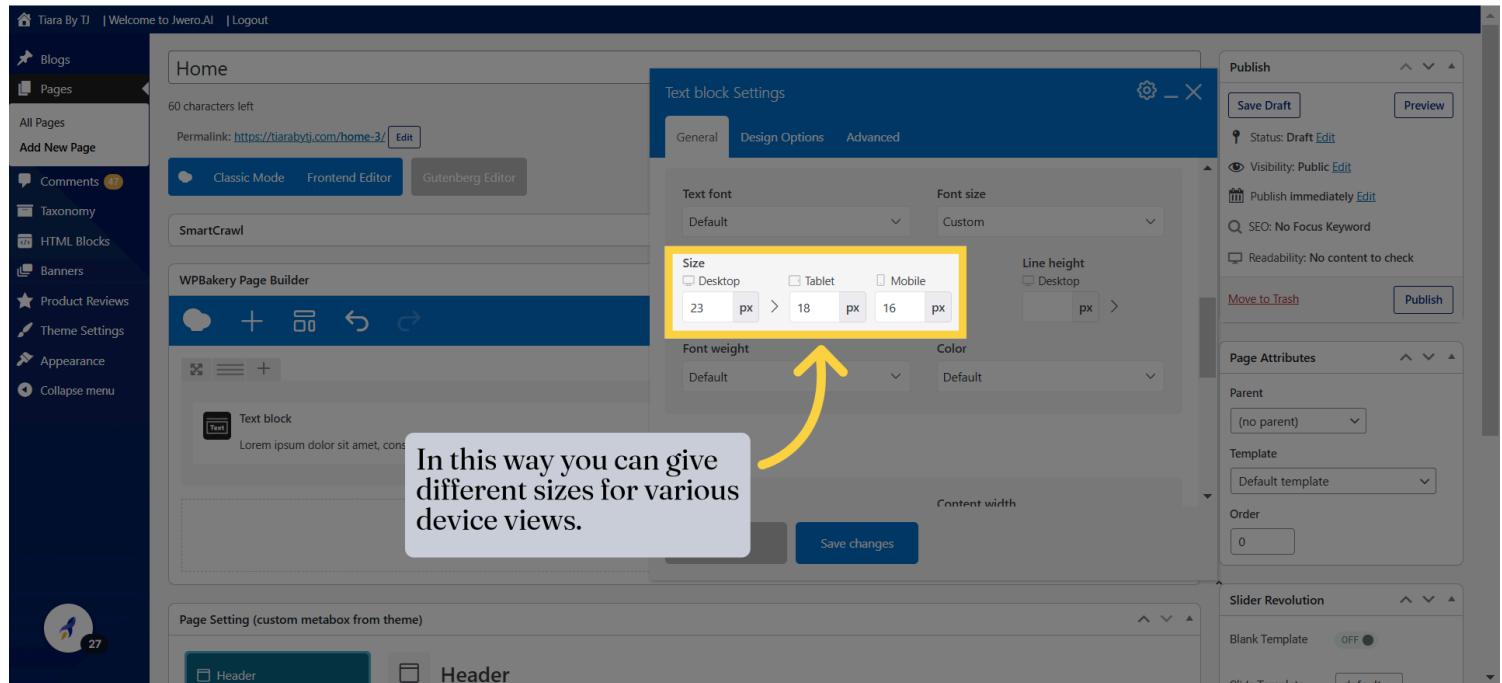

## 16. You can also set the different sizes for different device views by using "Custom".

A screenshot of the WPBakery Page Builder interface, similar to the previous one but with more options visible. The 'Text block' is selected. A callout box with the text 'You can also set the different sizes for different device views by using "Custom".' points to a dropdown menu labeled 'Font size'. This dropdown is highlighted with a yellow border and shows the option 'Custom'.

## 17. Click on " > " to set sizes for Tablet and Mobile view.

## 18. In this way you can give different sizes for various device views.

## 19. Similarly, you can set the "Line Height" for various device views.

Similarly, you can set the "Line Height" for various device views.

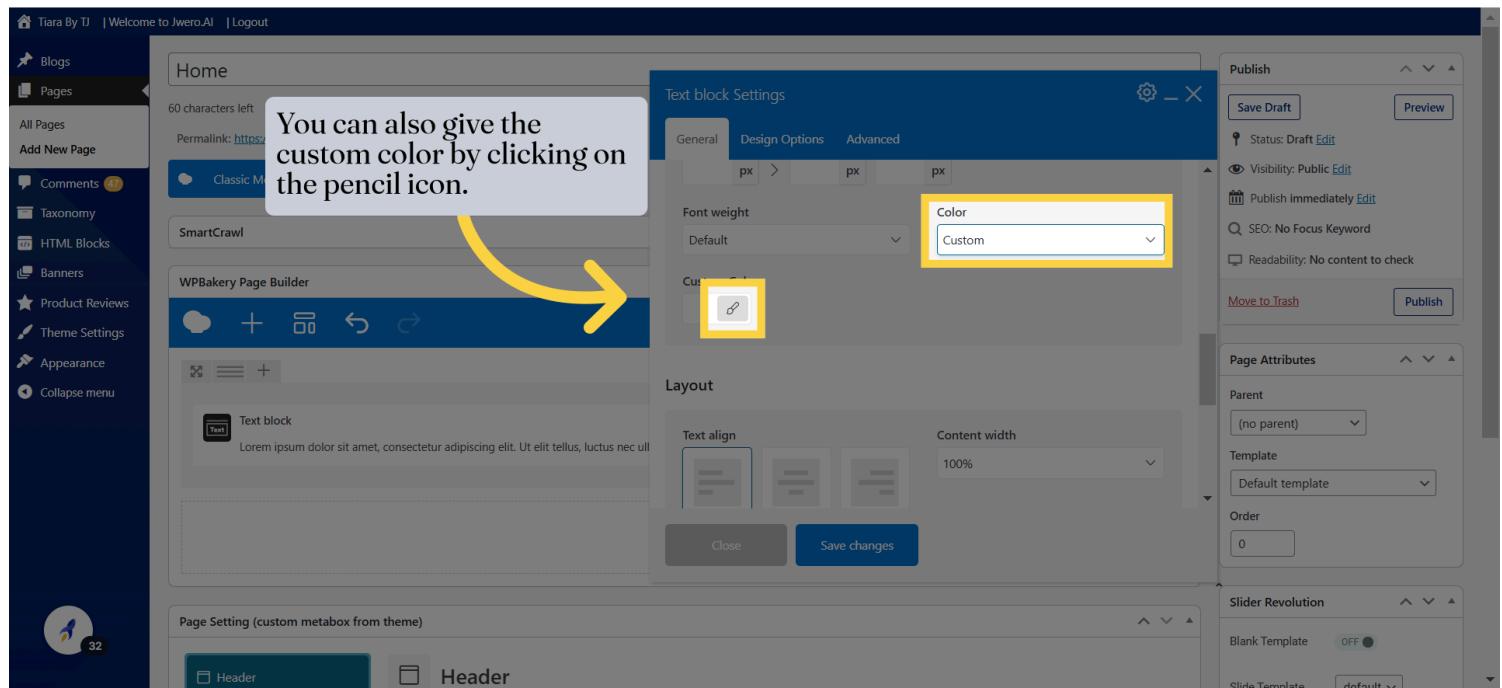

The screenshot shows the WordPress dashboard with the "Text block" element selected in the WPBakery Page Builder. A yellow arrow points from the text "Similarly, you can set the 'Line Height' for various device views." to the "Line height" section of the "Text block Settings" metabox. This section allows setting line height for Desktop, Tablet, and Mobile devices, with input fields for px values.

## 20. Allows you to apply the text color. Choose the appropriate color from the given options.

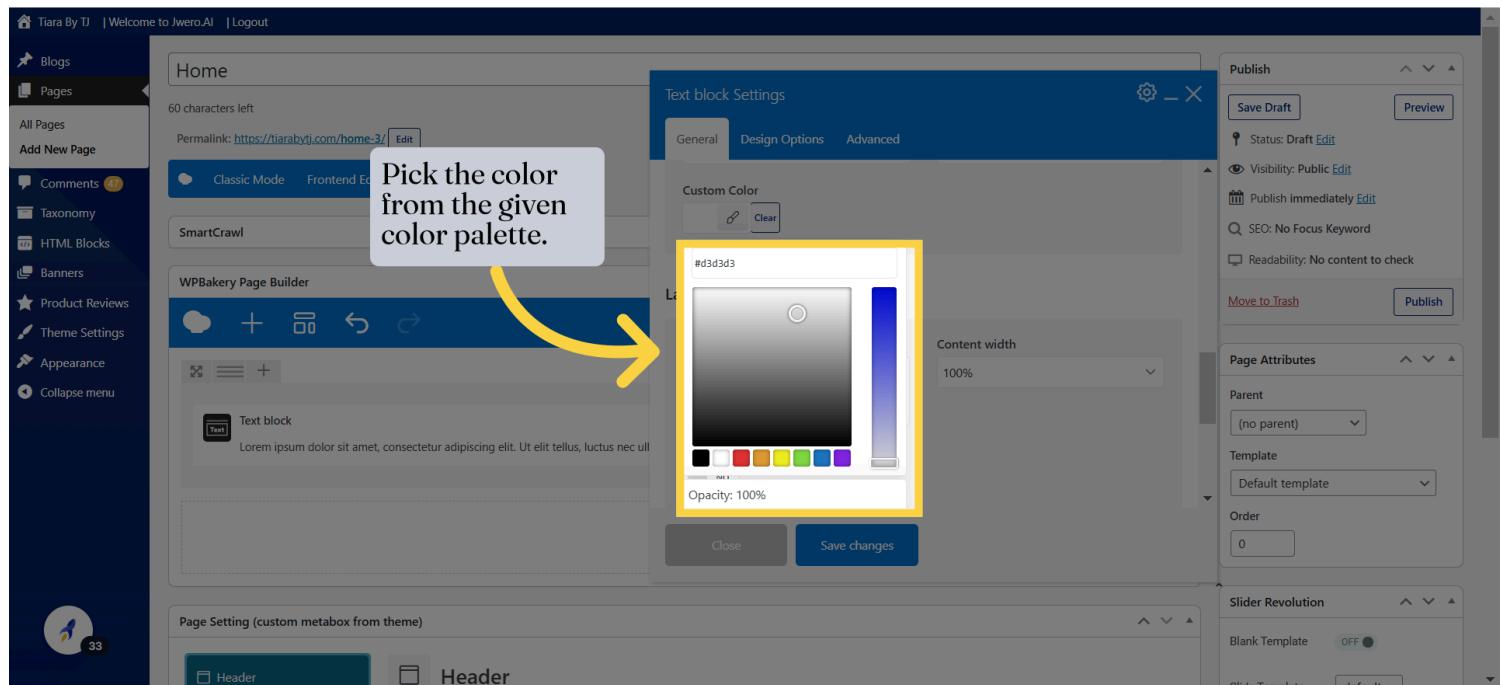

Allows you to apply the text color. Choose the appropriate color from the given options.

The screenshot shows the WordPress dashboard with the "Text block" element selected in the WPBakery Page Builder. A yellow arrow points from the text "Allows you to apply the text color. Choose the appropriate color from the given options." to the "Color" dropdown menu in the "Text block Settings" metabox. The dropdown menu shows color options: Default, Title, Primary, Alternative, and Custom.

## 21. You can also give the custom color by clicking on the pencil icon.

## 22. Pick the color from the given color palette.

## 23. Click on "Clear" to remove the color applied.

Click on "Clear" to remove the color applied.

The screenshot shows the WordPress dashboard with the 'Pages' menu item selected. A 'Text block' is being edited in the WPBakery Page Builder. The 'Design Options' tab of the 'Text block Settings' modal is open, showing a color picker with a hex code #117cb2. A yellow arrow points to the 'Clear' button in the top right corner of the color palette. The 'Alpha: 100%' slider is at its maximum. Below the color palette are 'Close' and 'Save changes' buttons.

## 24. Allows you to give boldness to the text.

Allows you to give boldness to the text.

The screenshot shows the WordPress dashboard with the 'Pages' menu item selected. A 'Text block' is being edited in the WPBakery Page Builder. The 'Text block Settings' modal is open, showing the 'Text font' section with 'Default' selected. A yellow arrow points to the 'Font weight' dropdown menu, which is also set to 'Default'. Below these settings are 'Font size' and 'Color' dropdown menus, both set to 'Default'. At the bottom of the modal are 'Close' and 'Save changes' buttons. The sidebar on the left shows page settings like 'Header', 'Page title', and 'Footer'.

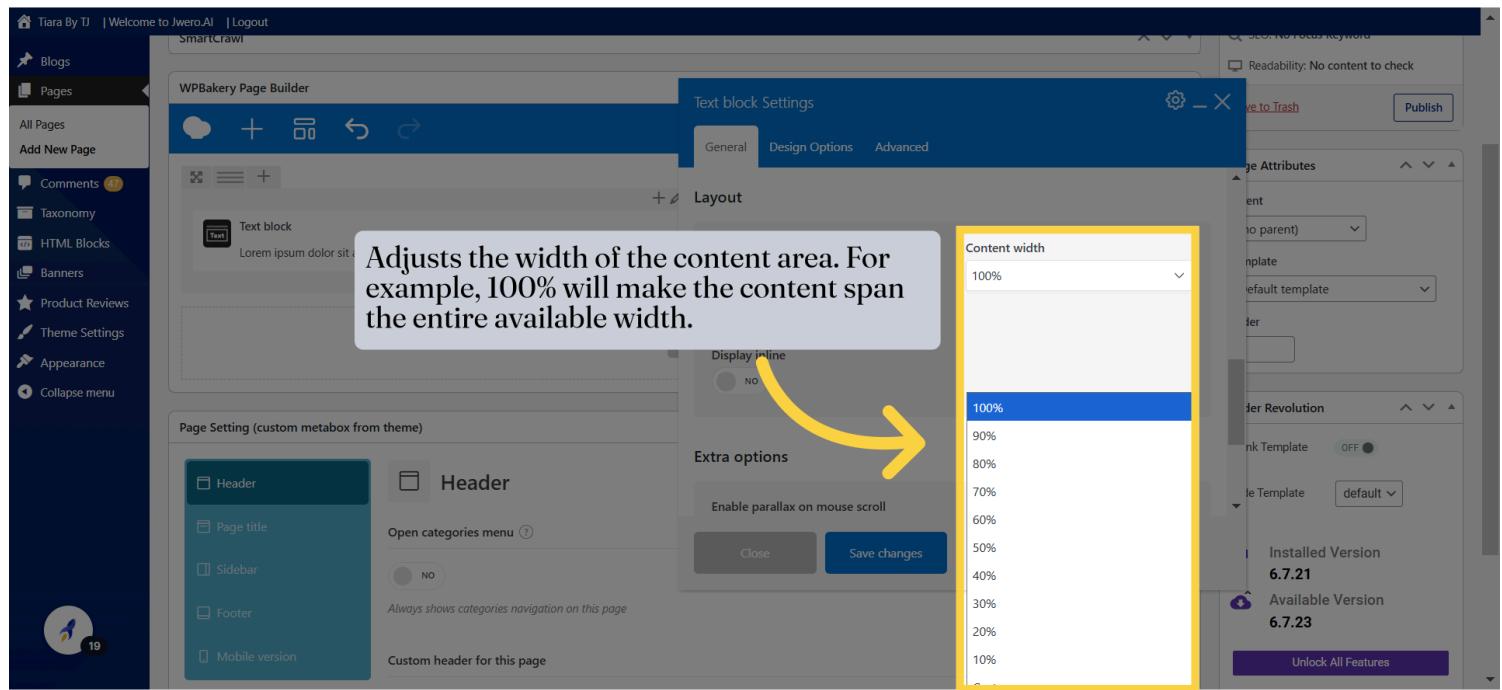

## 25. Choose the appropriate weight from the given options.

The screenshot shows the WPBakery Page Builder interface. A text block is selected, and its settings are open. A callout box with the text "Choose the appropriate weight from the given options." points to a dropdown menu titled "Default" which lists various font weights: Ultra-Light 100, Light 200, Book 300, Normal 400, Medium 500, Semi-Bold 600, Bold 700, Extra-Bold 800, and Ultra-Bold 900. The entire dropdown menu is highlighted with a yellow box.

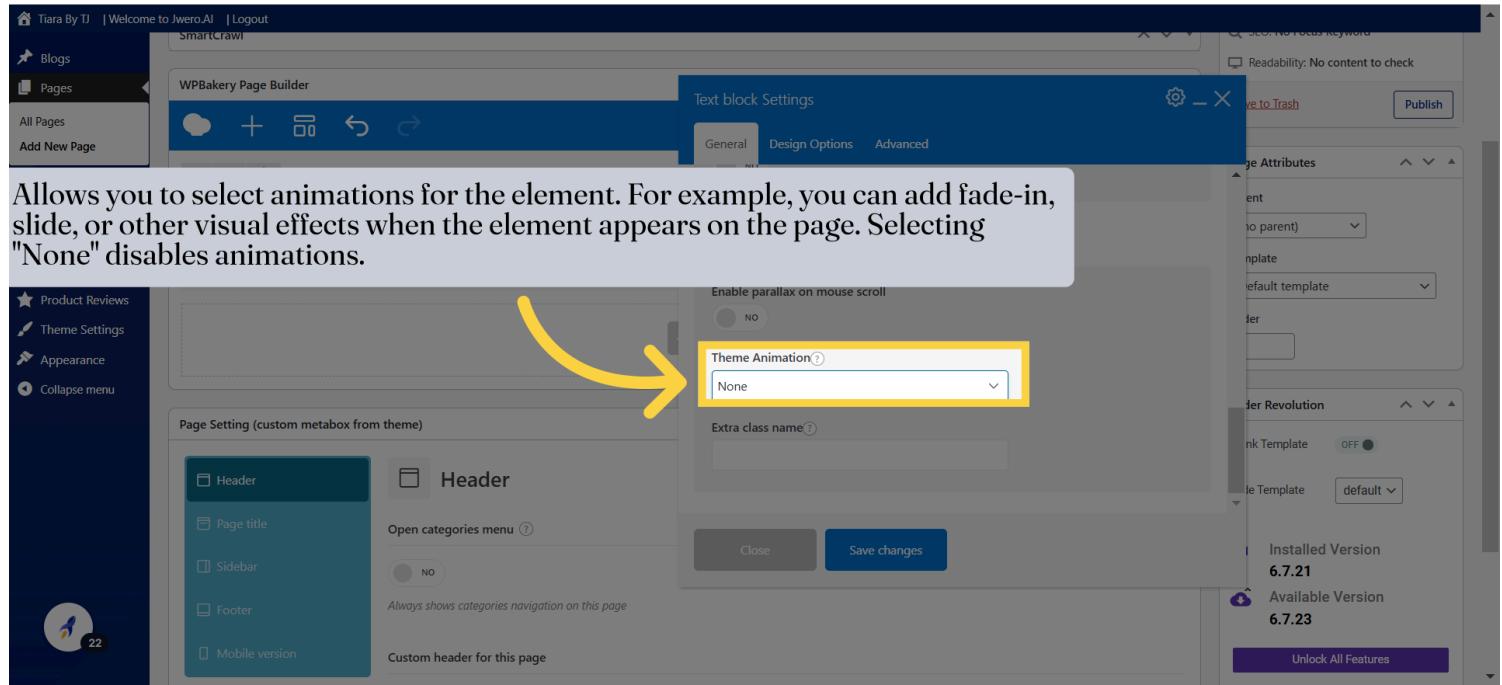

**26. Allows you to align text to the left, center, or right, based on the selected icon.**

The screenshot shows the WPBakery Page Builder interface. A text block is selected, and its settings are open. A callout box with the text "Allows you to align text to the left, center, or right, based on the selected icon." points to a "Text align" section containing three icons for left, center, and right alignment. The entire "Text align" section is highlighted with a yellow box.

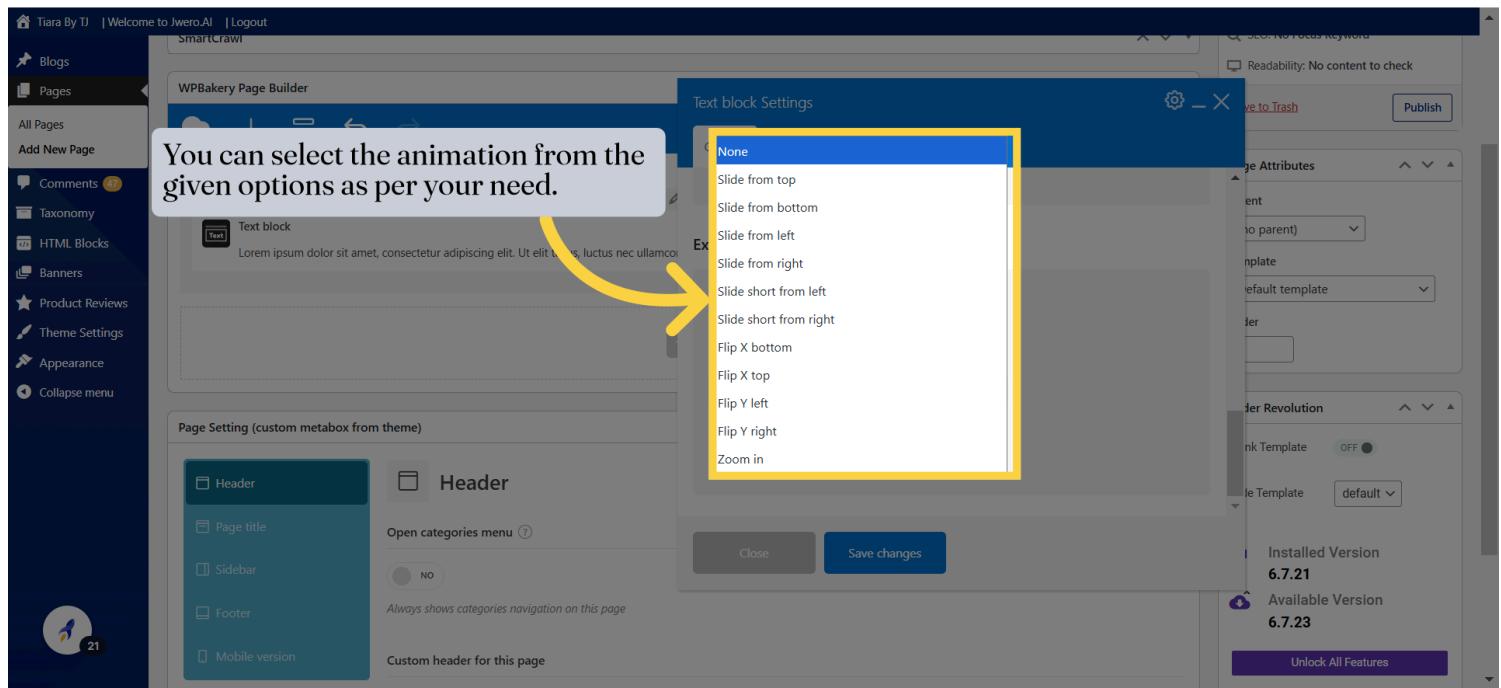

**27. Adjusts the width of the content area. For example, 100% will make the content span the entire available width.**

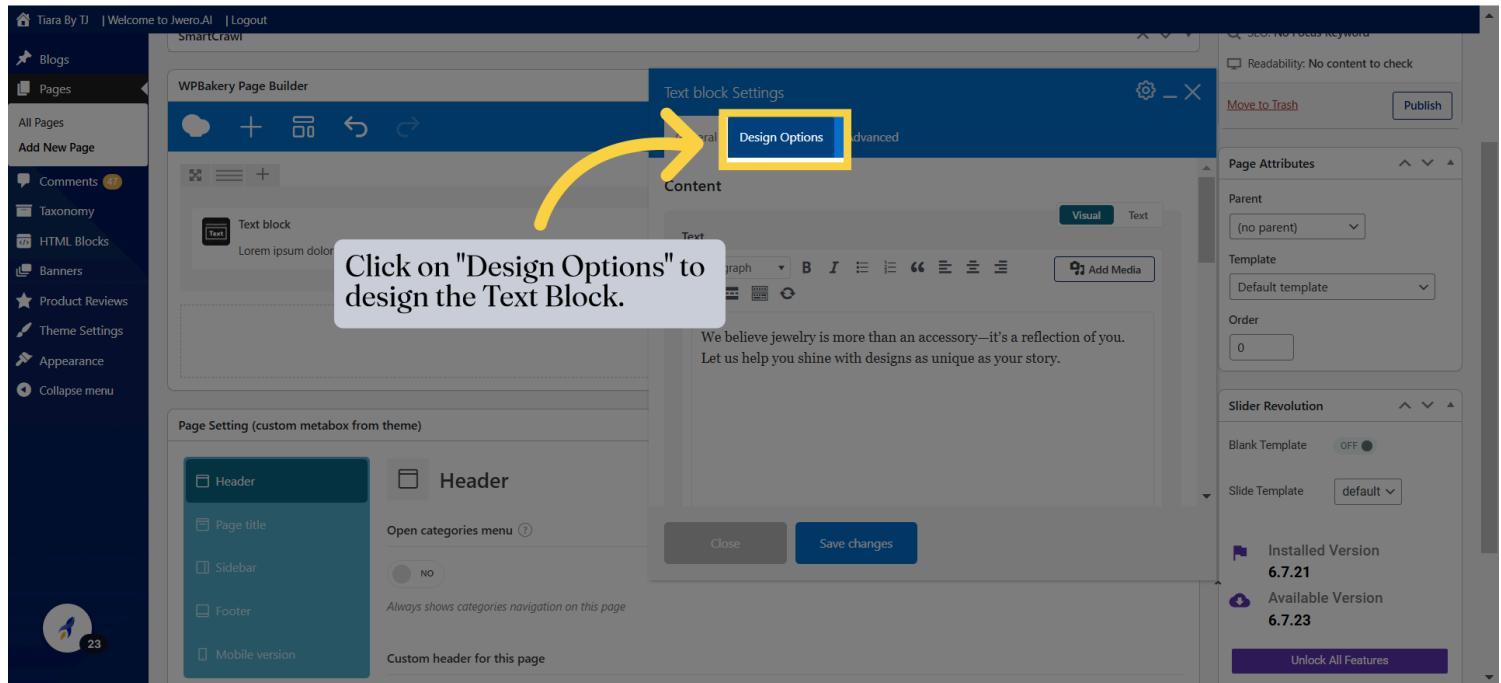

**28. Allows you to select animations for the element. For example, you can add fade-in, slide, or other visual effects when the element appears on the page. Selecting "None" disables animations.**

**29. You can select the animation from the given options as per your need.**

### 30. Click on "Design Options" to design the Text Block.

### 31. To learn more about the design options, search for the video "Design Options Of Elements".

The screenshot shows the WordPress dashboard with a modal window titled "Text block Settings". The modal has three tabs: "General", "Design Options" (which is selected), and "Advanced". The "Design Options" tab contains sections for "border" (with border width, style, and color controls) and "padding" (with padding top, bottom, left, and right controls). There is also a "Background" section with a color picker, an "Add image" button, and a "Theme defaults" dropdown. At the bottom of the modal are "Close" and "Save changes" buttons. A yellow arrow points from the text "To learn more about the design options, search for the video 'Design Options Of Elements'." to the "Design Options" tab in the modal.

### 32. The designed "Text Block" content will look like this on your website.

The screenshot shows the Tiara By TJ website. At the top, there is a navigation bar with links to HOME, ABOUT US, SHOP, DIGI GOLD, CONTACT, and DIGITAL GOLD PLANS. On the right side of the nav bar are icons for search, heart, cart, and user profile, along with a total of \$3,10,400. Below the nav bar is a dark header with the text "The designed 'Text Block' content will look like this on your website." A yellow arrow points from the text "We believe jewelry is more than an accessory—it's a reflection of you. Let us help you shine with designs as unique as your story." to this header. The main content area features a large text block with the same message, enclosed in a yellow box. At the bottom, there are two columns: one for newsletter subscription and one for social media follow.
