

How To Generate QR Code

1. QR code

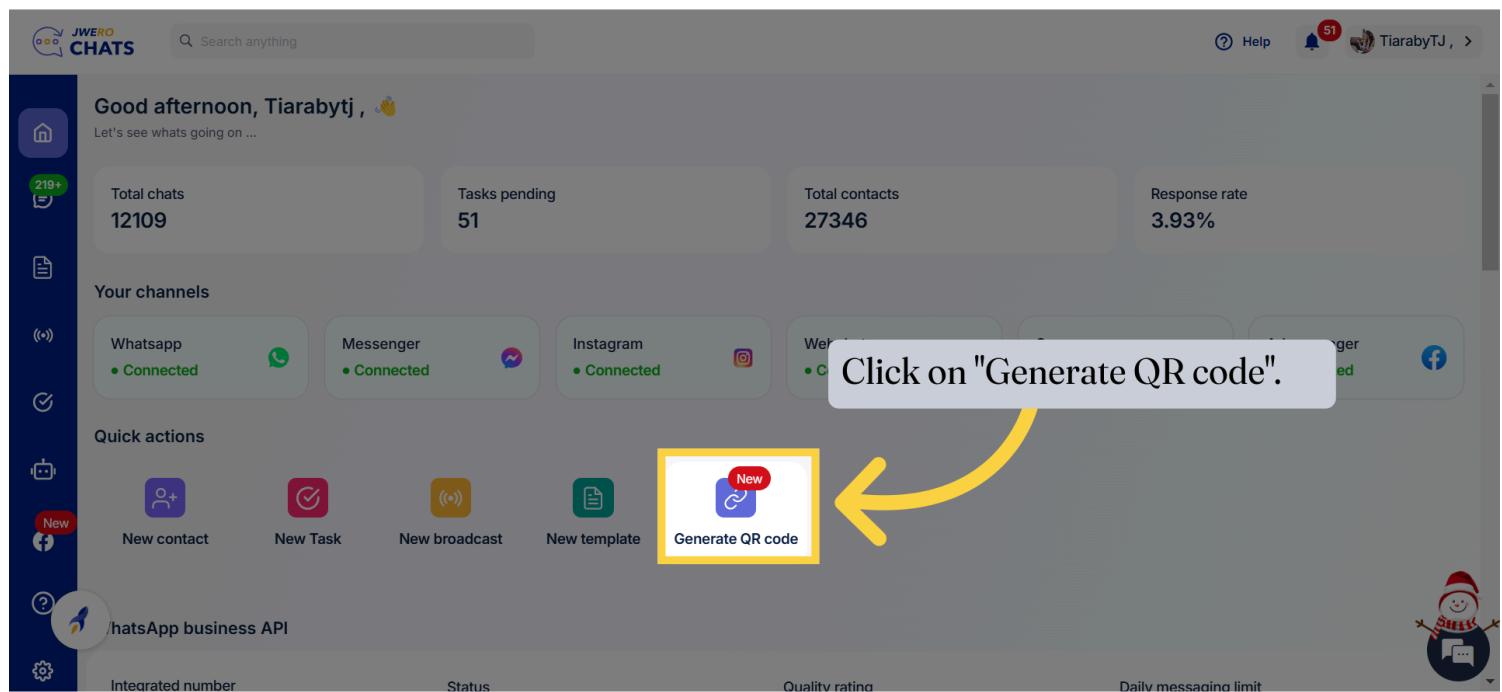

This QR code helps businesses generate leads and inquiries by enabling users to easily engage with the brand via WhatsApp. On scanning, it instantly starts a conversation, and a chatbot can be assigned to provide automated responses.

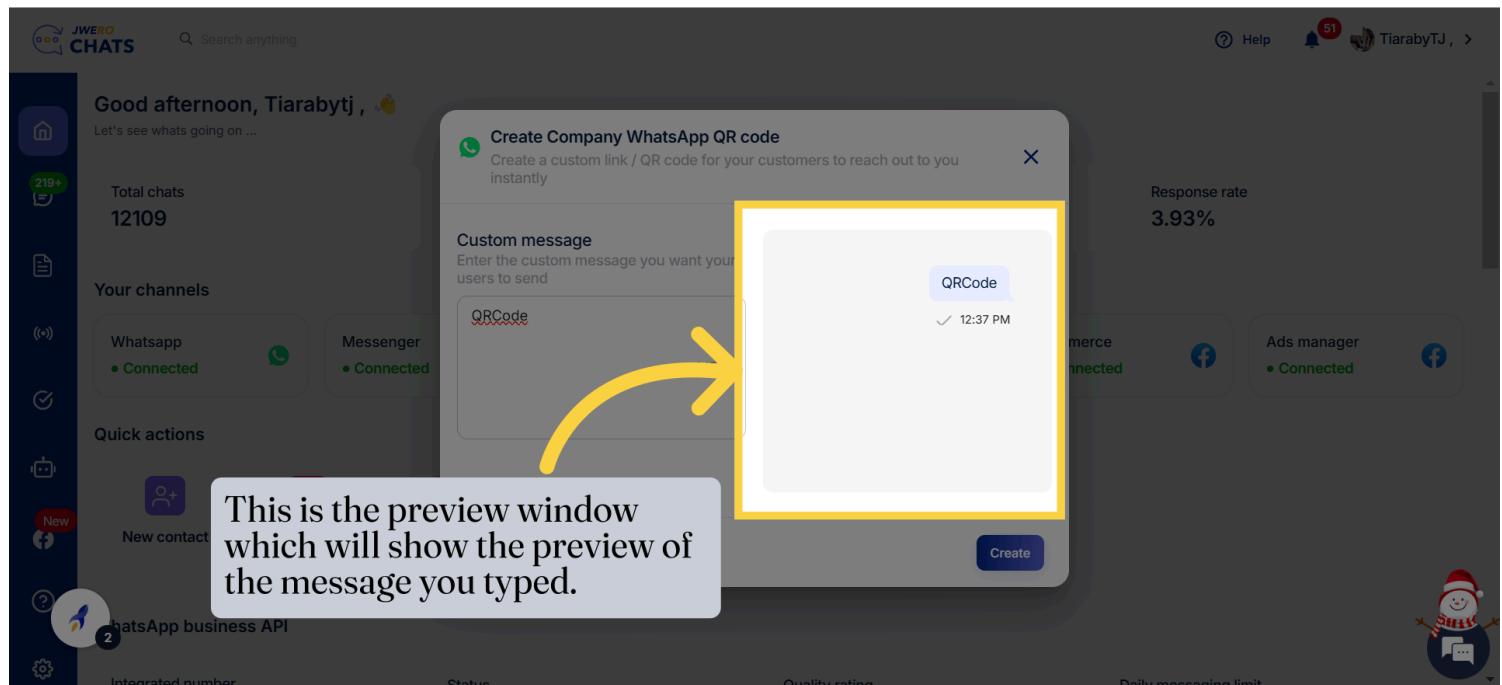

2. Click on the chats to generate the QR Code.

A screenshot of the JWERO CHATS dashboard. At the top, there's a search bar and a user profile. Below the header, a large yellow arrow points from the left towards a white tooltip box. The tooltip contains the text "Click on the chats to generate the QR Code." In the background, there are several cards with statistics: "Total chats 12109", "Tasks pending 51", "Total contacts 27346", and "Response rate 3.93%". Below these cards, there are sections for "WhatsApp", "Messenger", "Instagram", "Webchat", "Commerce", and "Ads manager", each showing a green "Connected" status. At the bottom, there's a "Quick actions" section with icons for "New contact", "New Task", "New broadcast", "New template", and "Generate QR code". A red "New" badge is visible next to the "Generate QR code" button. On the far right, there's a small cartoon character and some status indicators.

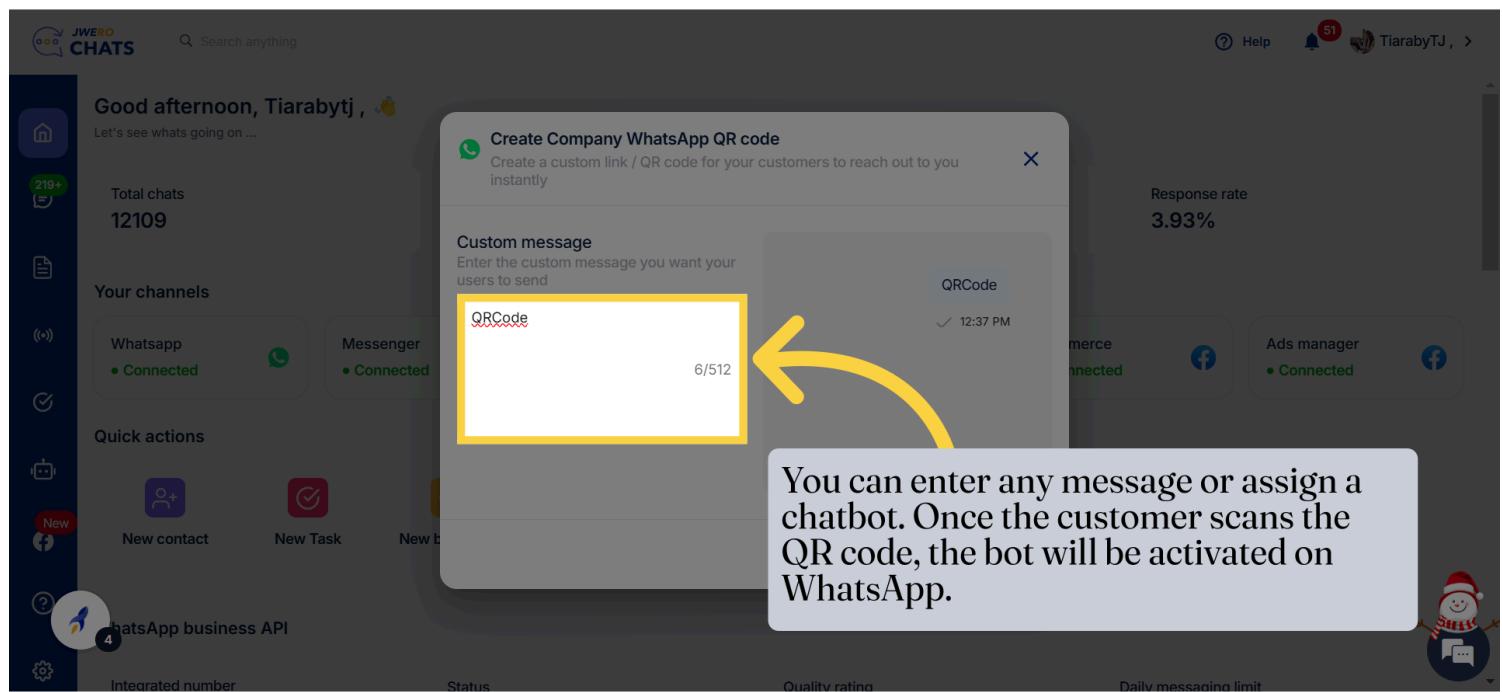

3. Click on "Generate QR code".

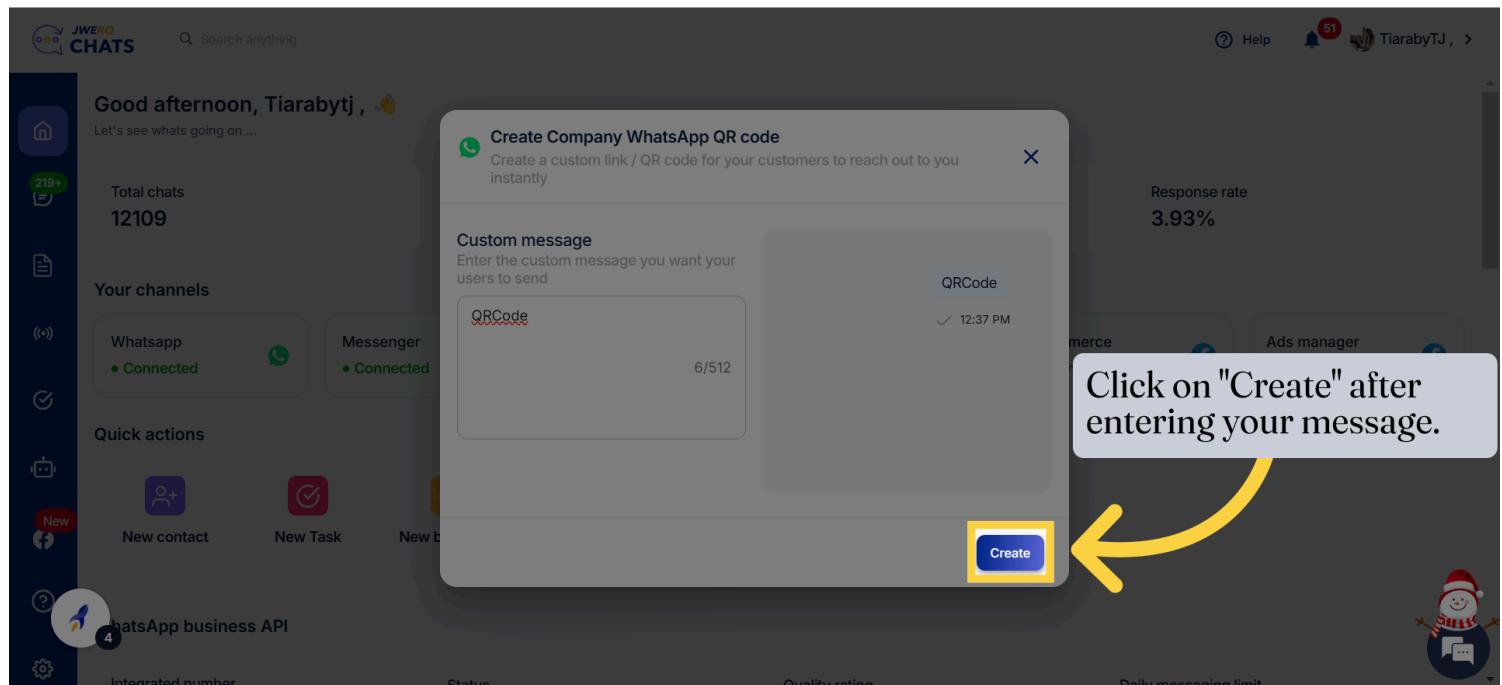

4. This is the preview window which will show the preview of the message you typed.

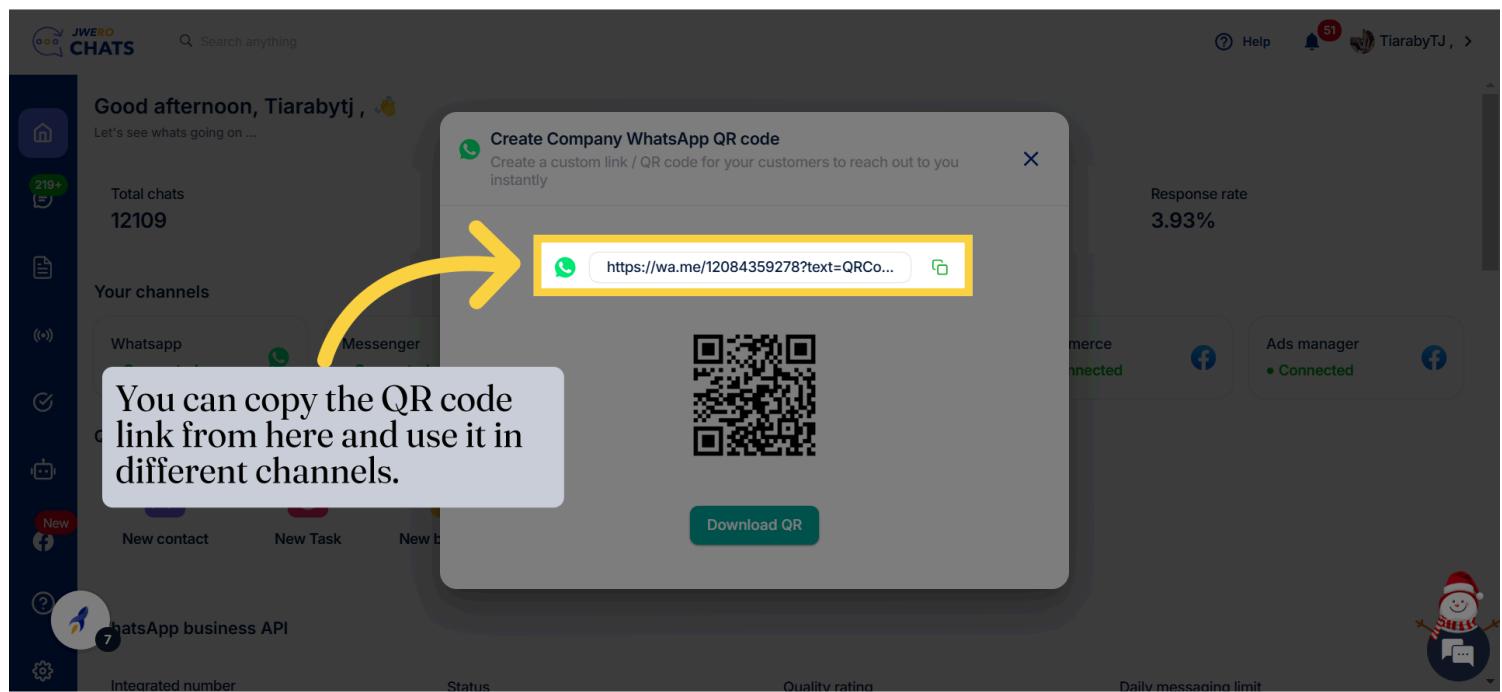

5. Custom message.

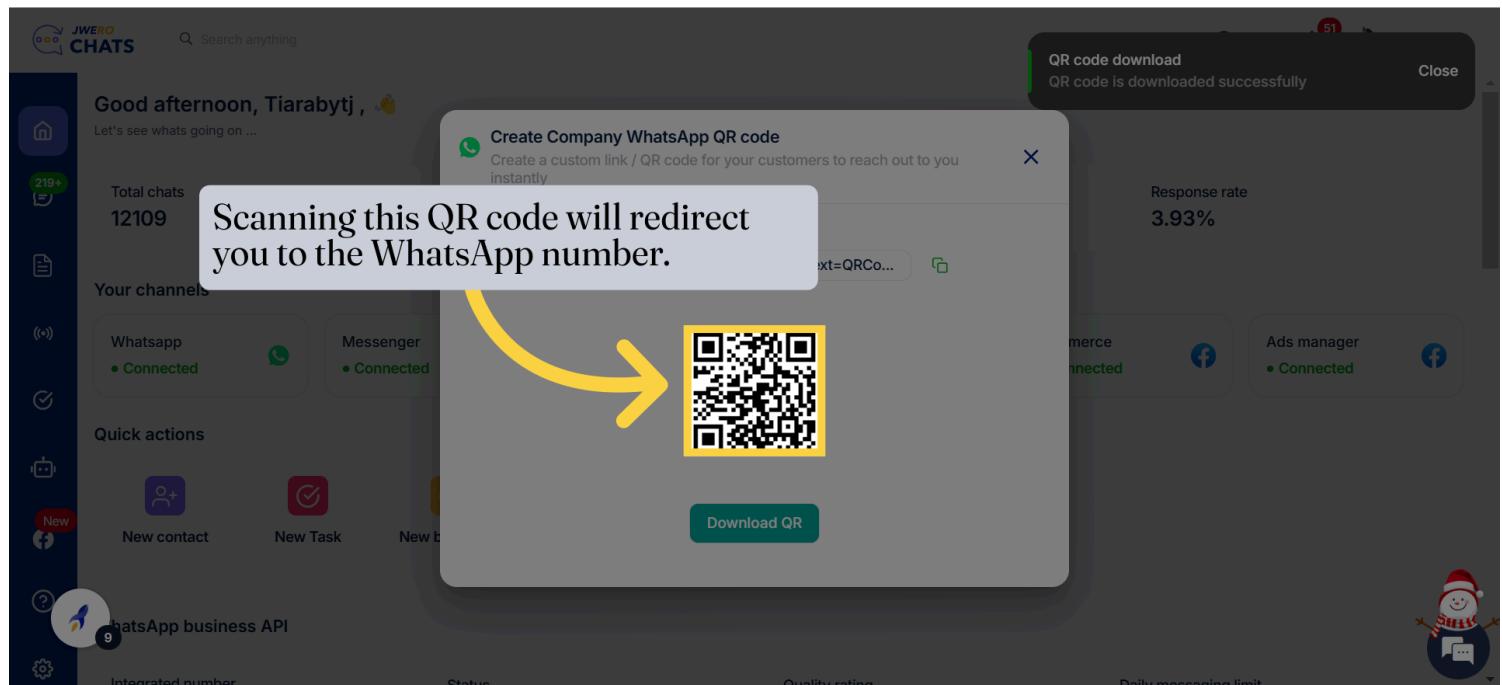

6. Click on "Create" after entering your message.

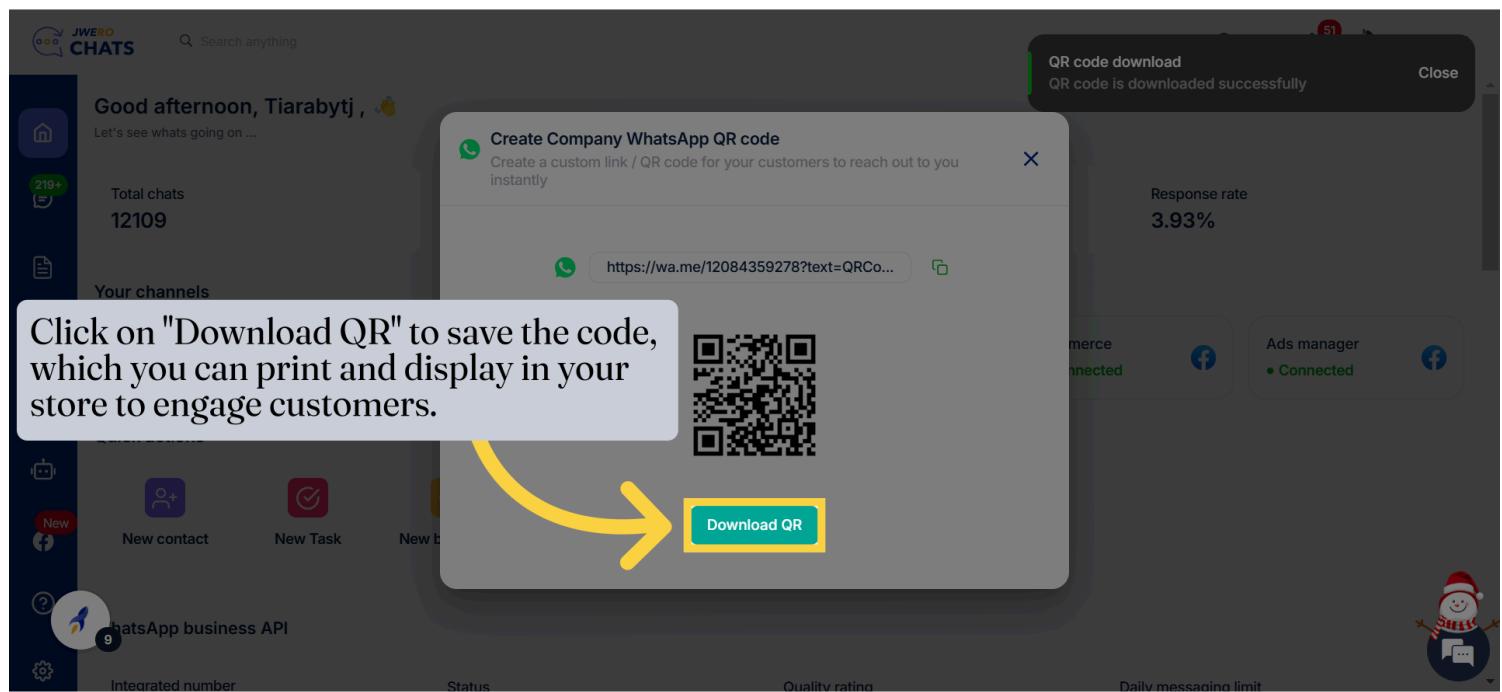

7. You can copy the QR code link from here and use it in different channels.

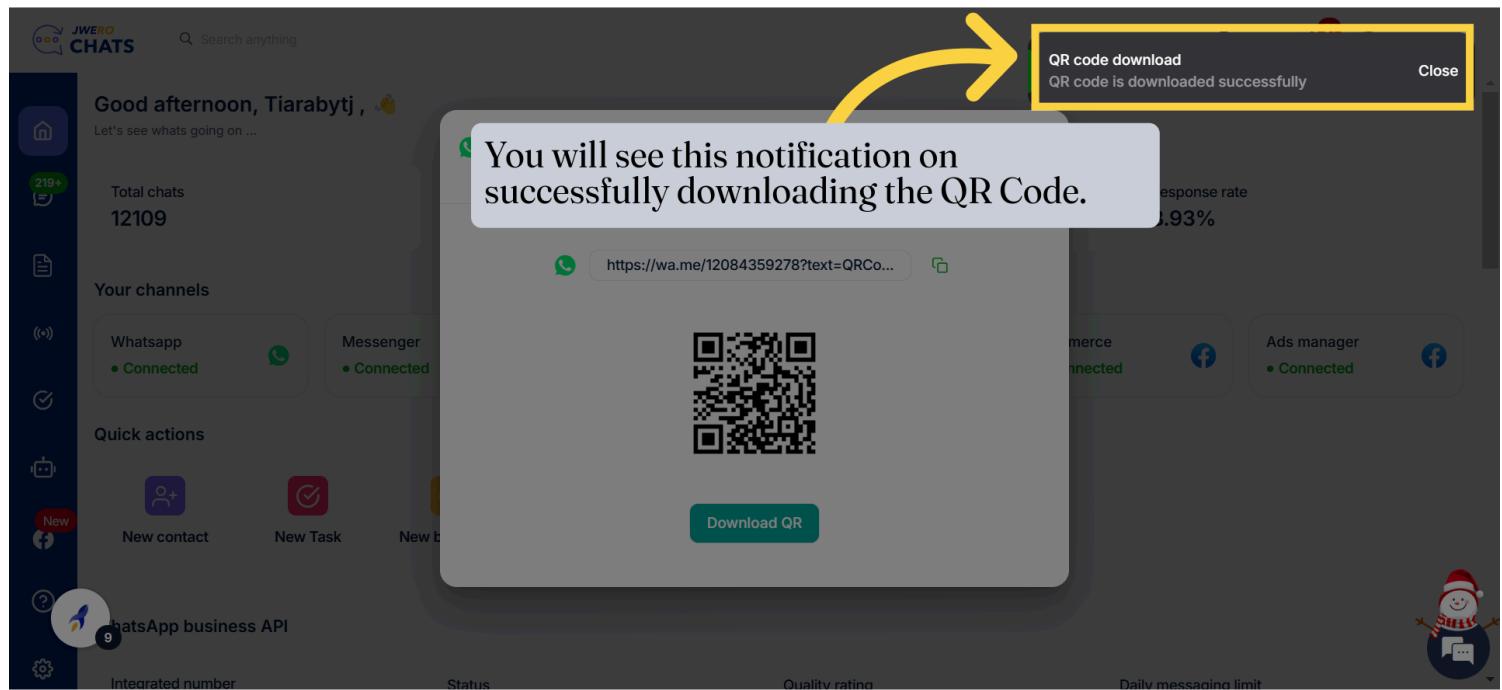

8. Scanning this QR code will redirect you to the WhatsApp number.

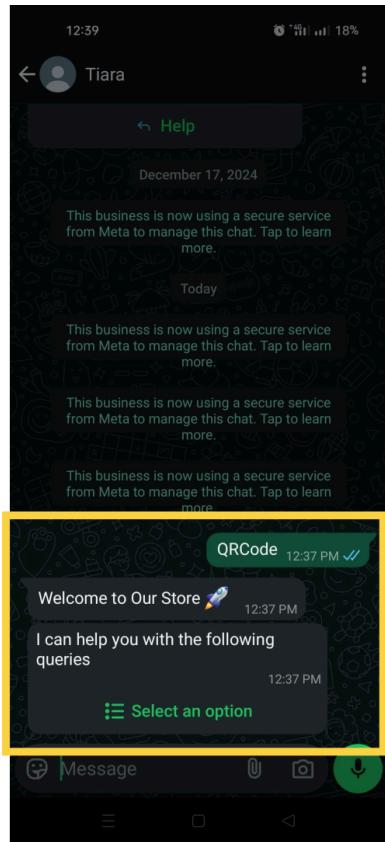

9. Download QR

10. QR Code downloaded notification.

11. Chatbot initiated on WhatsApp

This is how the chatbot "QRCode" was initiated on WhatsApp once the customer scans the QR code.
