

How To Design A Header

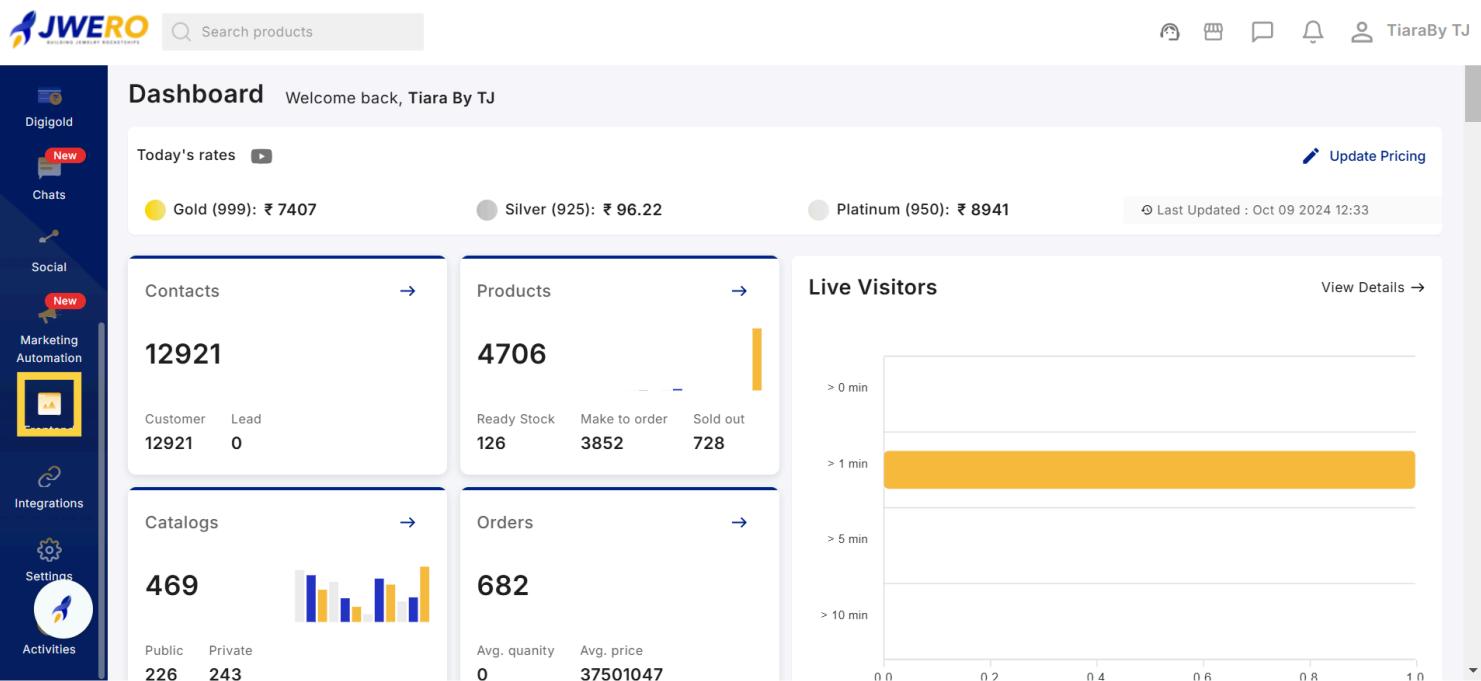

Enhance your header design with these detailed steps to create a visually appealing and functional header

Go to app.jwero.ai

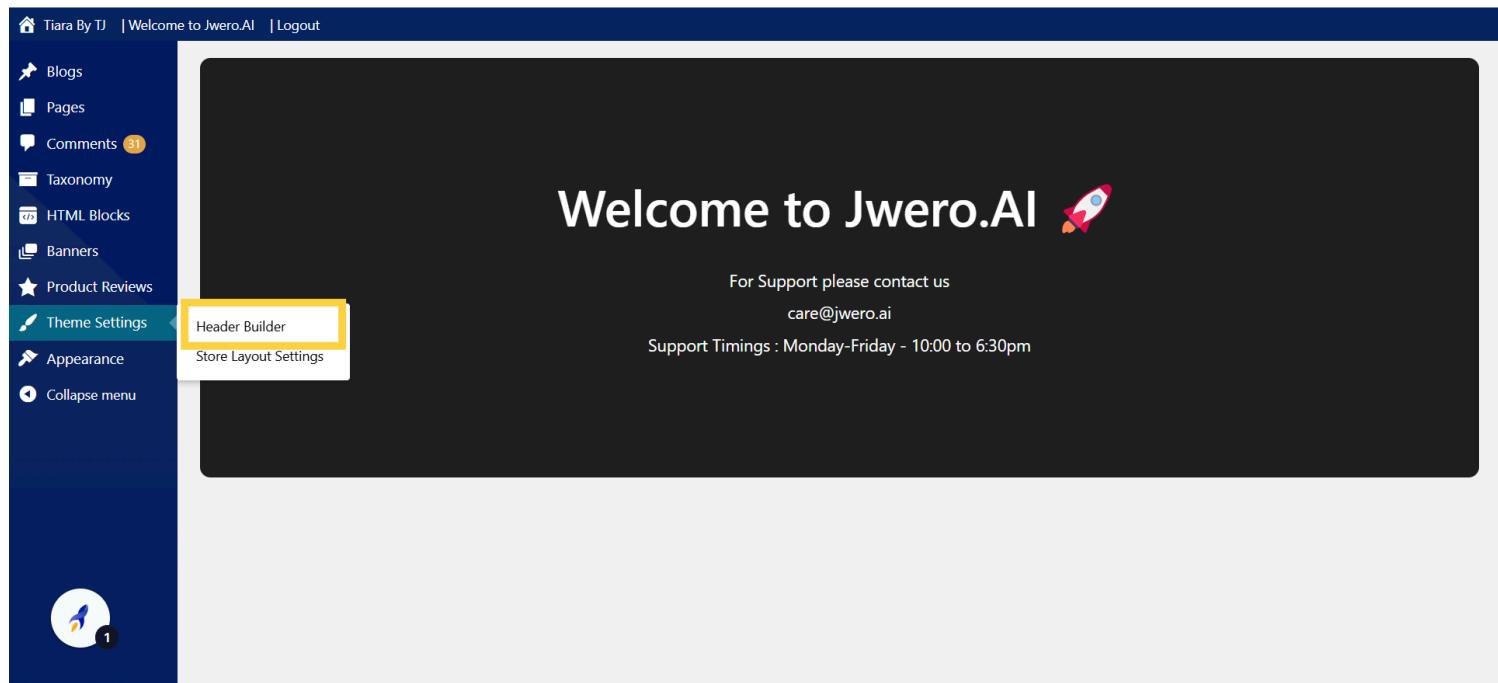

1. Click on "Frontend" to add and design the header.

Access the "Frontend" to do the required changes.

The screenshot shows the Jwero AI dashboard. On the left, there's a sidebar with icons for Digigold, Chats, Social, Marketing Automation, Integrations, Settings, and Activities. The main dashboard has sections for Contacts (12921), Products (4706), Catalogs (469), and Orders (682). It also displays today's rates for Gold (₹ 7407), Silver (₹ 96.22), and Platinum (₹ 8941), along with a note about last update. A chart titled 'Live Visitors' shows visitor duration distribution.

2. Click on "Header Builder" to create the header.

The screenshot shows the Jwero AI header builder interface. On the left, a sidebar lists options like Blogs, Pages, Comments, Taxonomy, HTML Blocks, Banners, Product Reviews, Theme Settings (which is selected and highlighted in blue), Appearance, and a Collapse menu. A notification icon with the number '1' is visible. The main area features a dark background with white text. It says 'Welcome to Jwero.AI' with a rocket ship emoji, provides support contact information (care@jwero.ai), and lists support timings (Monday-Friday - 10:00 to 6:30pm).

3. Click on Settings icon to design the header.

The screenshot shows the 'Header Section Menu' editor interface. On the left, a sidebar lists site navigation: Blogs, Pages, Comments (3), Taxonomy, HTML Blocks, Banners, Product Reviews, Theme Settings, Appearance, and Collapse menu. A circular icon with a rocket ship is at the bottom. The main area has tabs for Desktop, Mobile, and Settings. Under Desktop, the 'Edit' tab is active. A yellow box highlights the 'Top bar' section, which includes a 'Divider', a 'Menu' button, another 'Divider', and a 'Text/HTML' button. Below this are sections for 'Main header' and 'Header bottom', each containing various UI components like 'Logo', 'Search', 'Social links icons', and 'Categories'.

4. Click "Edit" to design the header created. If it's not created then create it first.

The screenshot shows the 'Headers builder' page. At the top, there's a search bar with 'Search by name' placeholder text and buttons for 'Import header' and '+ Add new header'. Below is a list of header layouts: 'Default header layout', 'Header E-Commerce', 'Header With categories menu', 'Home Eight header', 'Header Overlap', and 'Header Jewellery'. Each layout has an 'Edit' button and a three-dot menu icon. A sidebar on the left contains the same navigation as the previous screenshot, plus a '3' notification icon at the bottom.

5. Click on Settings icon to design the header.

The screenshot shows the 'Header Section Menu' configuration page. At the top, there are tabs for 'Edit', 'Desktop', 'Mobile' (which is selected), and 'Settings'. Below these are sections for 'Top bar' (containing 'Social links icons') and 'Main header' (containing 'Mobile menu', 'Logo', and 'Cart'). A 'Header bottom' section is also present. At the bottom of the main area are 'Save header' and 'Export' buttons. A yellow box highlights the 'Top bar' section.

6. Choose the number of columns for the row. You can select between 1 or 3 columns based on how you want to divide the top bar.

A modal window titled 'Configure Top bar settings' is open. It has tabs for 'General' and 'Style', with 'General' selected. The 'Layout' section is highlighted with a yellow box. It contains a 'Row columns' field with '1' and '3' options, where '3' is selected. Below it is a 'Row flex layout' section with three 'FLEX' buttons. A note at the bottom says: 'Determine the "flex layout" for this row. More information about both options read in our documentation here.' At the bottom of the modal are 'Save' and 'Cancel' buttons.

7. Choose the number of columns for the row. You can select between 1 or 3 columns based on how you want to divide the top bar.

The screenshot shows the 'Configure Top bar settings' dialog box. The 'General' tab is selected. In the 'Layout' section, there is a 'Row columns' field with two options: '1' and '3', where '3' is highlighted. Below it is a 'Row flex layout' section containing three horizontal buttons labeled 'FLEX' with arrows pointing left and right. A note below the buttons says: 'Determine the "flex layout" for this row. More information about both options read in our documentation here.' At the bottom of the dialog is an orange 'Save' button.

8. Set the height of the header row for desktop view in pixels.

The screenshot shows the 'Configure Top bar settings' dialog box. The 'General' tab is selected. In the 'Height' section, there is a 'Row height' field with a slider set to 42 pixels. Below it is a note: 'Determine the header height value in pixels.' There is also a 'Row height on mobile devices' field with a slider set to 38 pixels. Below it is a note: 'Determine the header height for mobile devices value in pixels.' At the bottom of the dialog is an orange 'Save' button.

9. Hide on Desktop: Disables this row from appearing on desktop devices when turned ON. Hide on Mobile: Disables this row from appearing on mobile devices when turned ON.

Configure Top bar settings

General Style

Responsive

Hide on desktop Hide on mobile

OFF OFF

Disable this row for desktop devices. Disable this row for mobile devices.

Sticky

Make it sticky ?

Save

10. Keeps the row fixed (sticky) at the top of the page while scrolling when turned ON.

Configure Top bar settings

General Style

Hide on desktop Hide on mobile

OFF OFF

Disable this row for desktop devices. Disable this row for mobile devices.

Sticky

Make it sticky ?

OFF

The following option will not work if "Sticky header clone" is enabled in header settings.

Save

11. Let's move to Styling.

Apply styles to the header

Configure Top bar settings

General **Style** Set as default

Top bar

Hide on desktop **Hide on mobile**

OFF OFF

Disable this row for desktop devices. Disable this row for mobile devices.

Sticky

Make it sticky ?

OFF

The following option will not work if "Sticky header clone" is enabled in header settings.

Save

12. Choose between dark or light text colors based on your background for better readability.

Configure Top bar settings

General **Style** Set as default

Text color scheme

Dark **Light**

Select different text color scheme depending on your background.

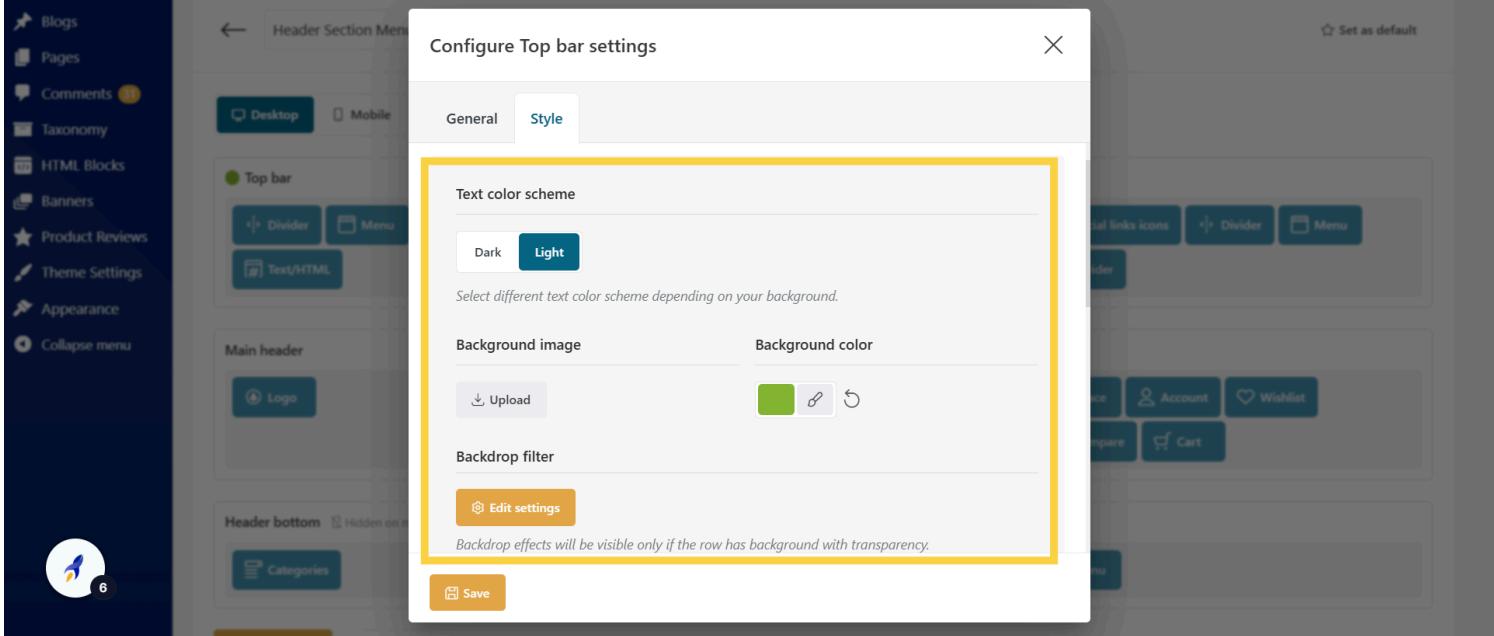

Background image **Background color**

Backdrop filter

Backdrop effects will be visible only if the row has background with transparency.

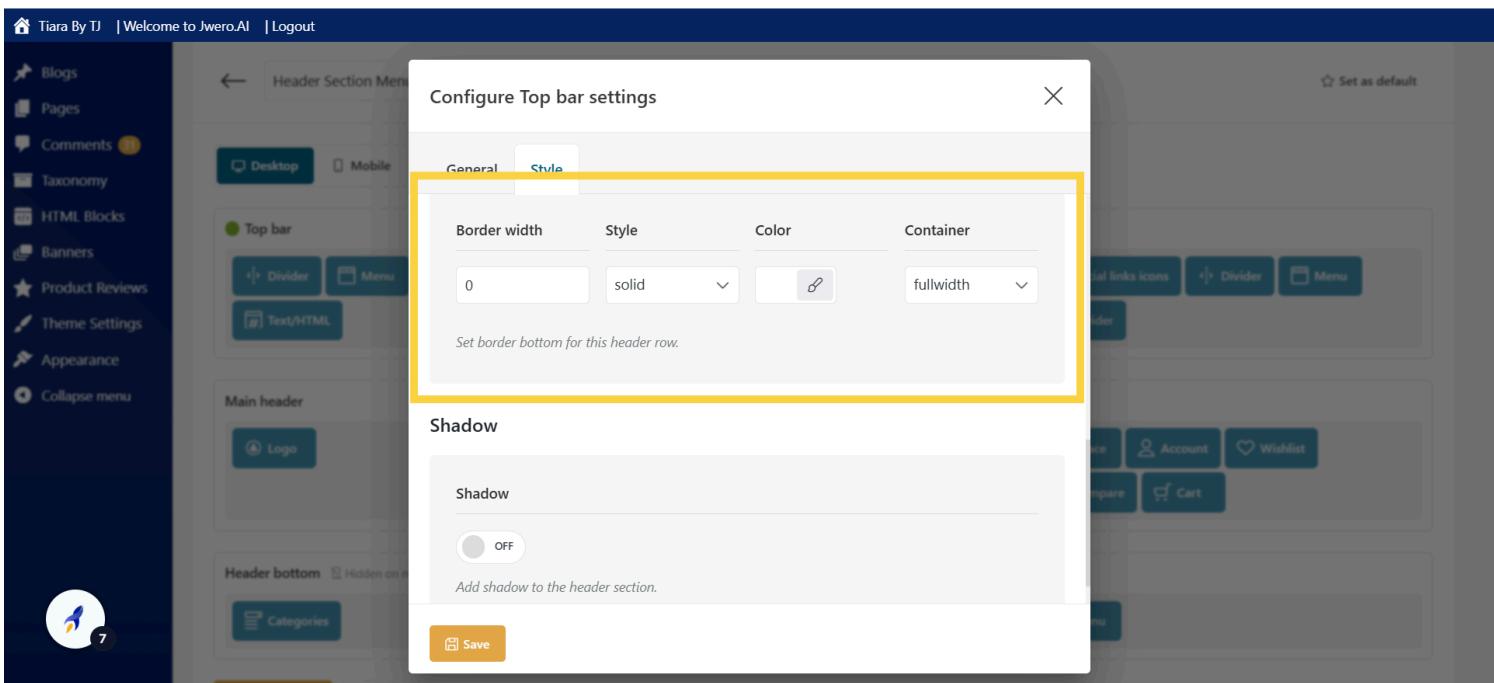

Save

13. Choose between dark or light text colors based on your background for better readability.

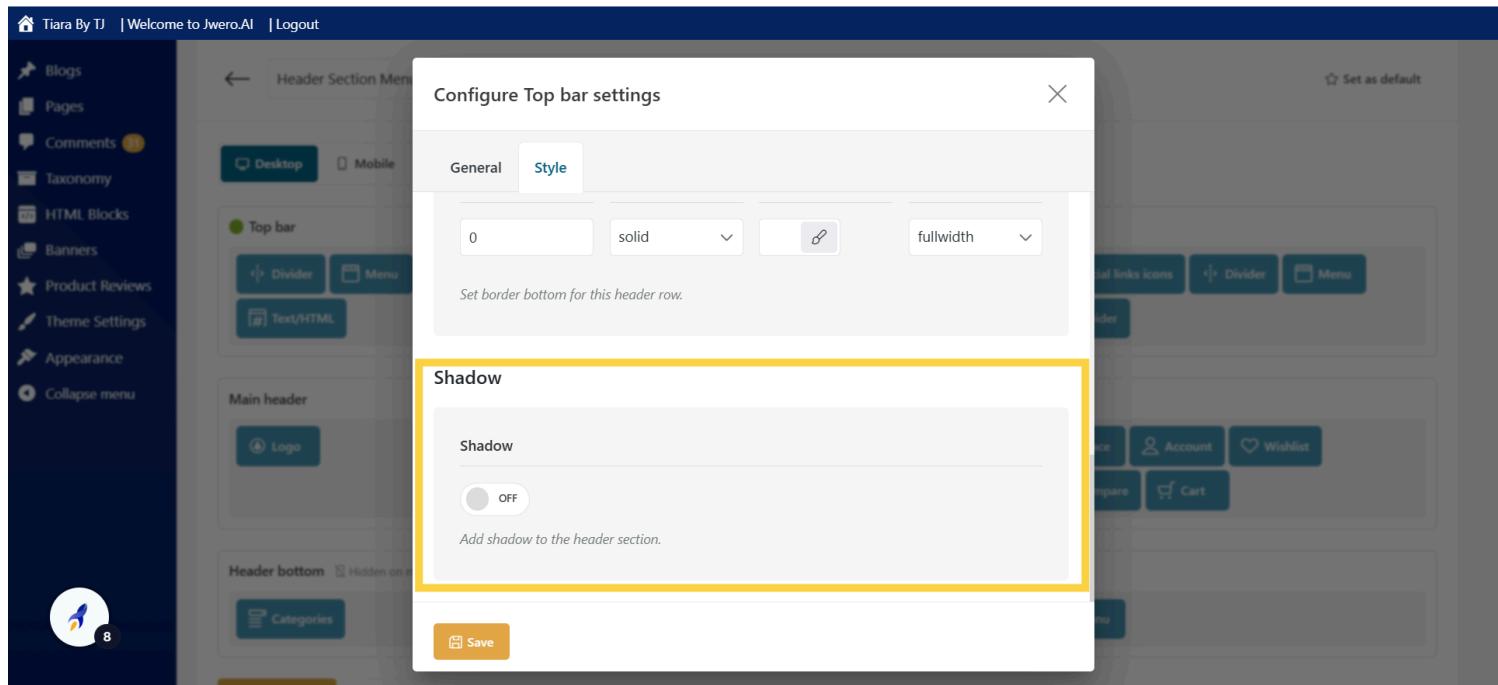

14. Set border for the header row.

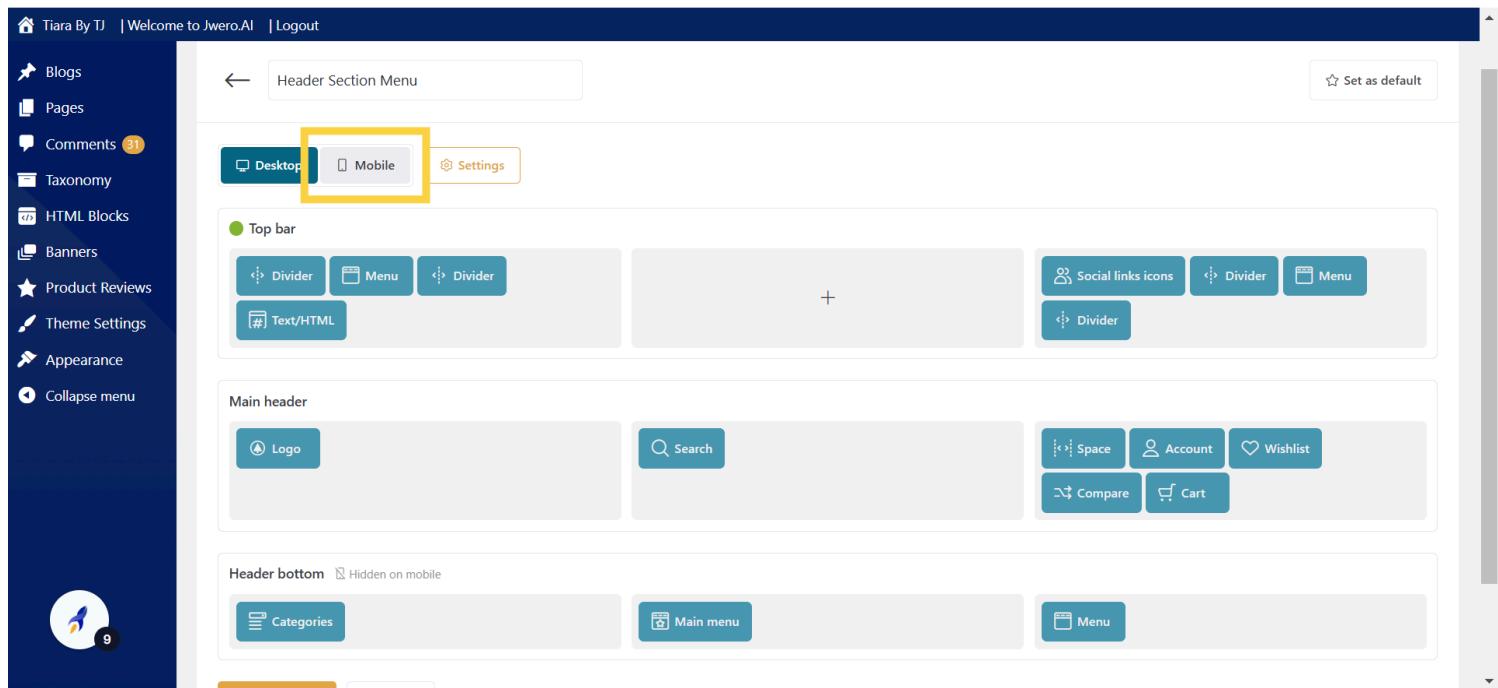

Border Width: Set the thickness of the bottom border in pixels. **Style:** Choose the border style (e.g., solid, dashed, dotted). **Color:** Select the border color. **Container:** Define whether the border spans the full width of the screen or is contained within the content width.

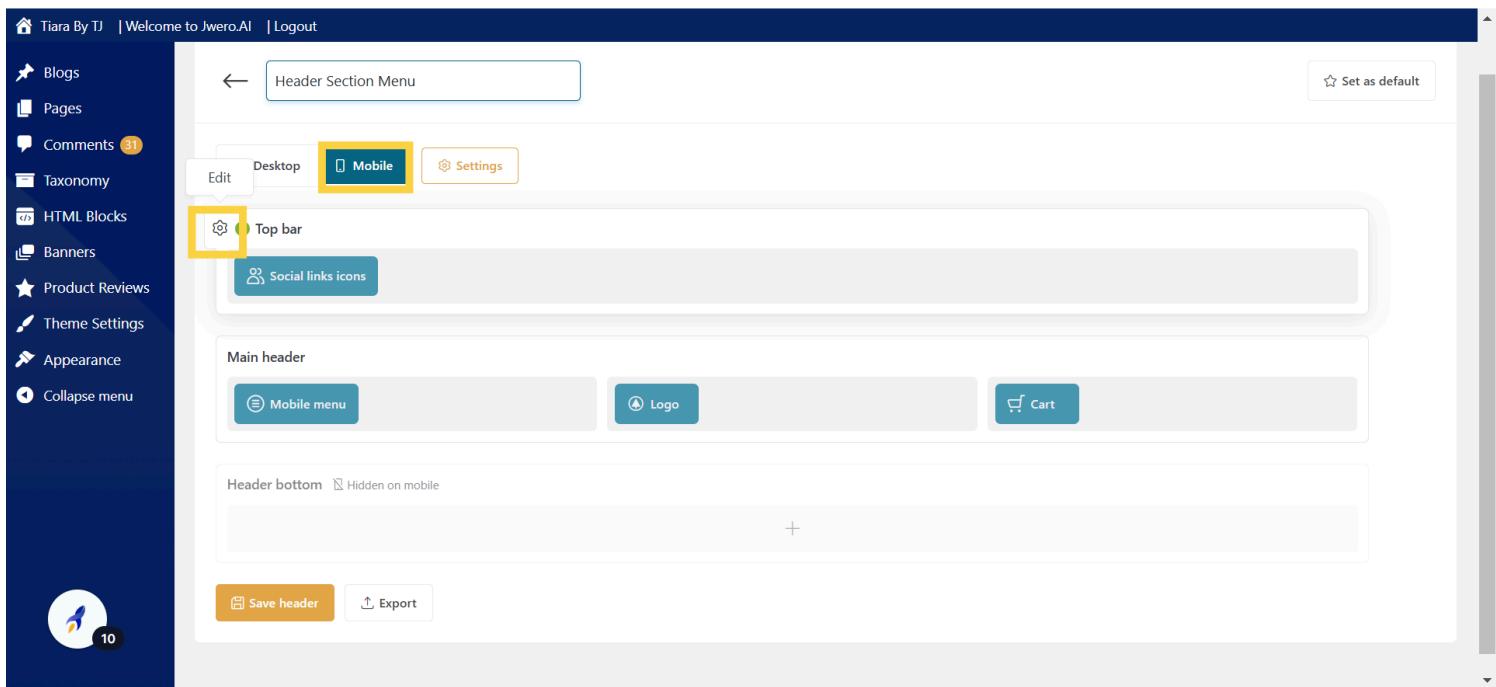

15. Toggle this setting to enable or disable a shadow effect for the header section, enhancing its visual depth.

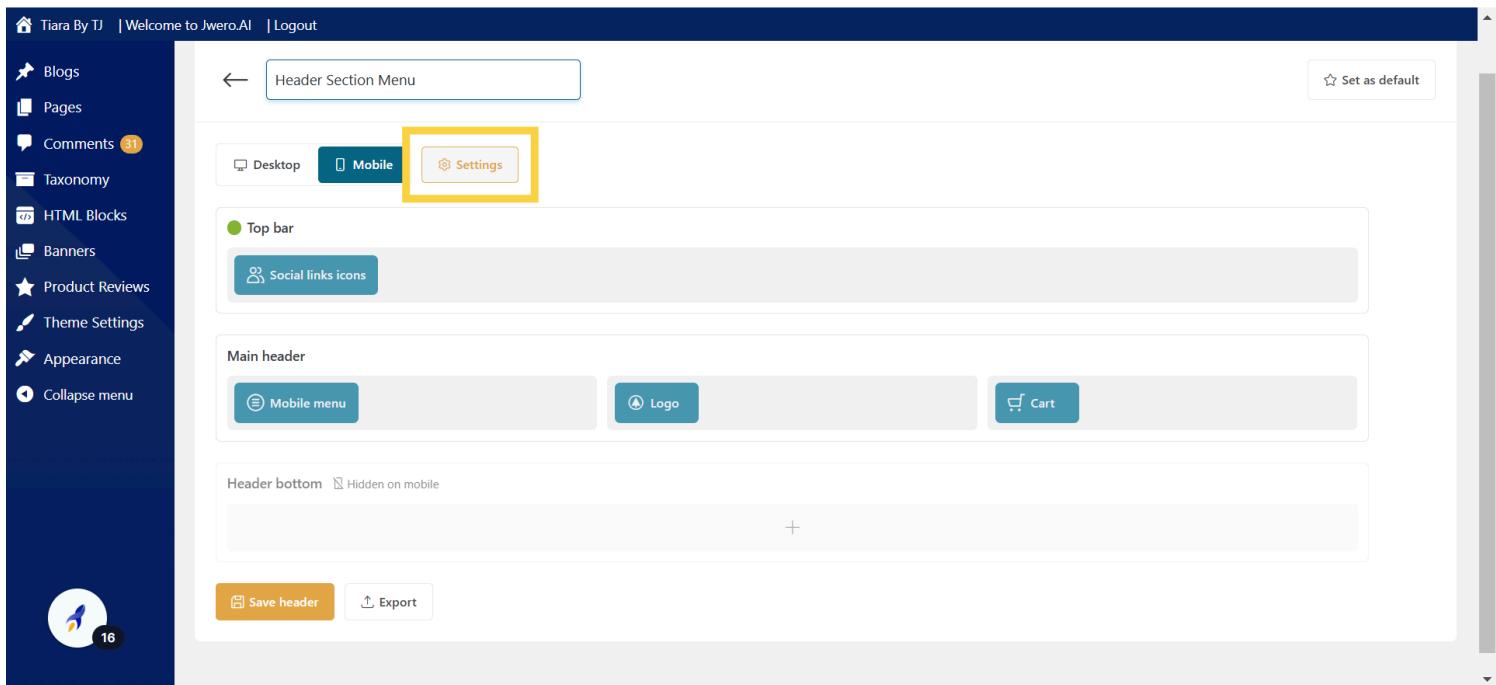

16. Click "Mobile"

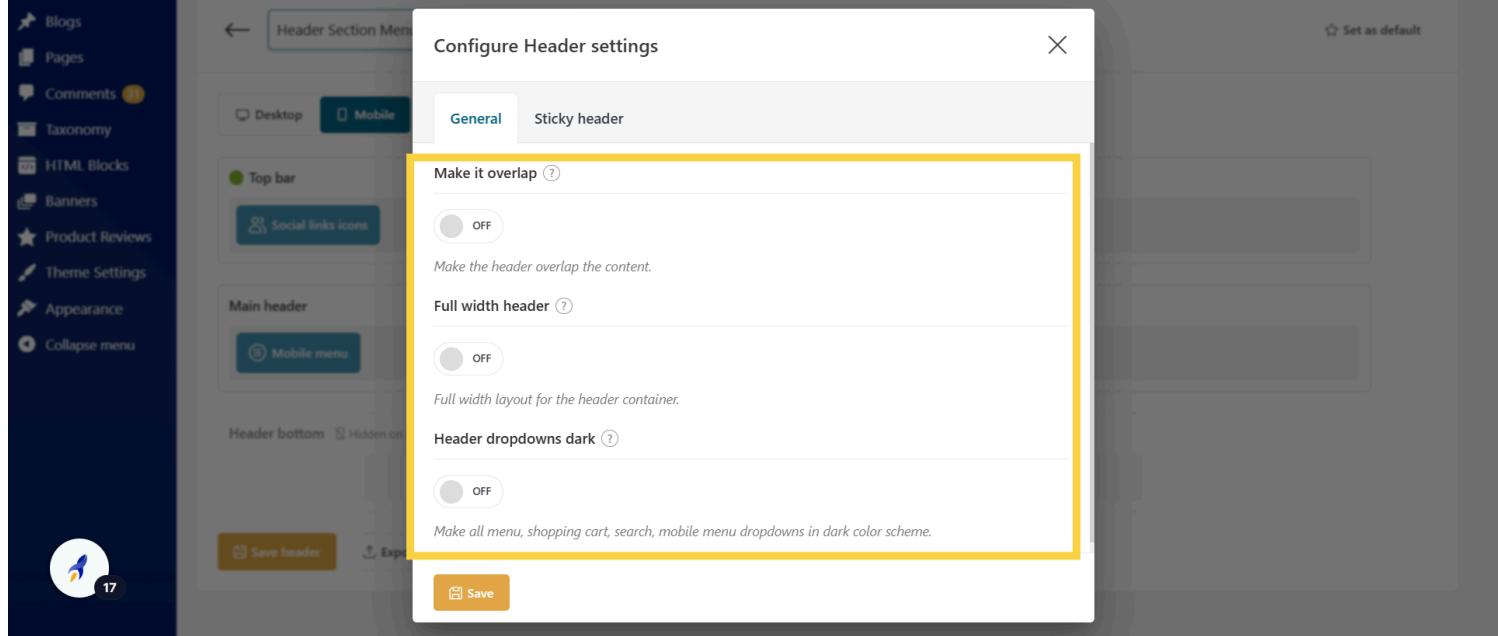

17. All the design options will be same for the Mobile web view.

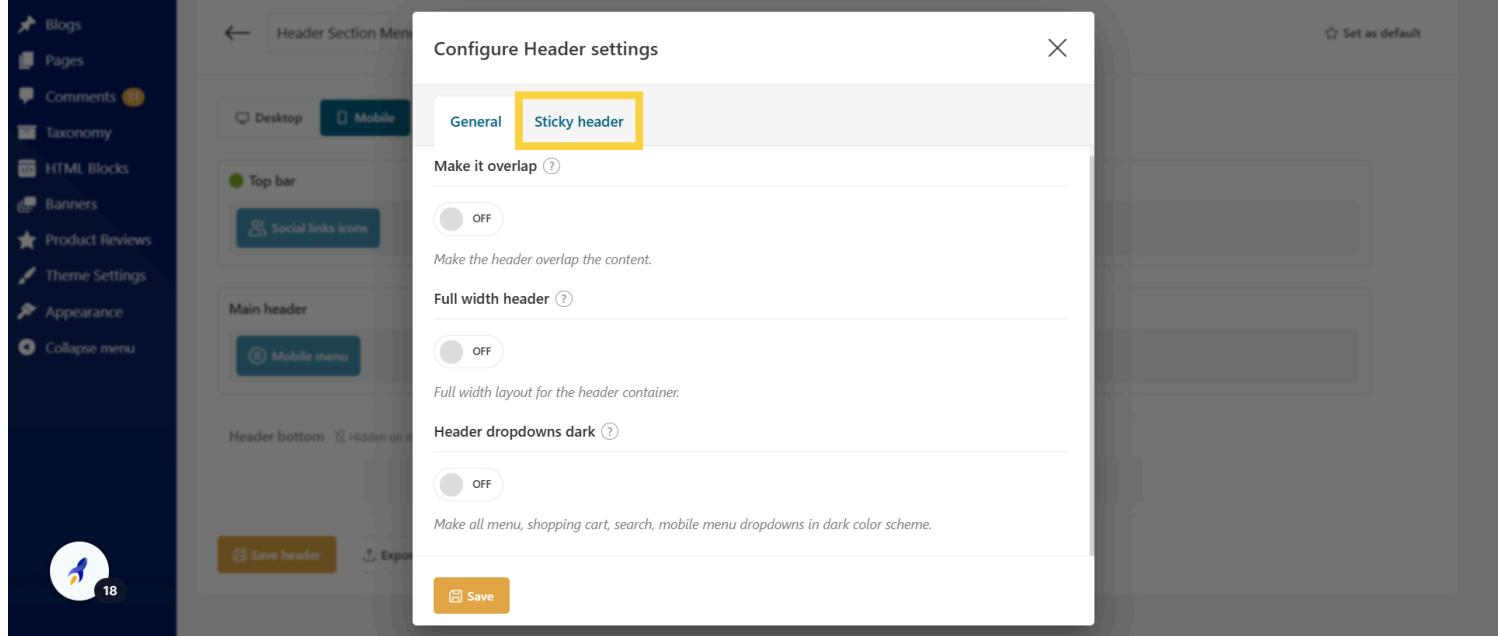

18. Click "Settings" to configure entire Header section.

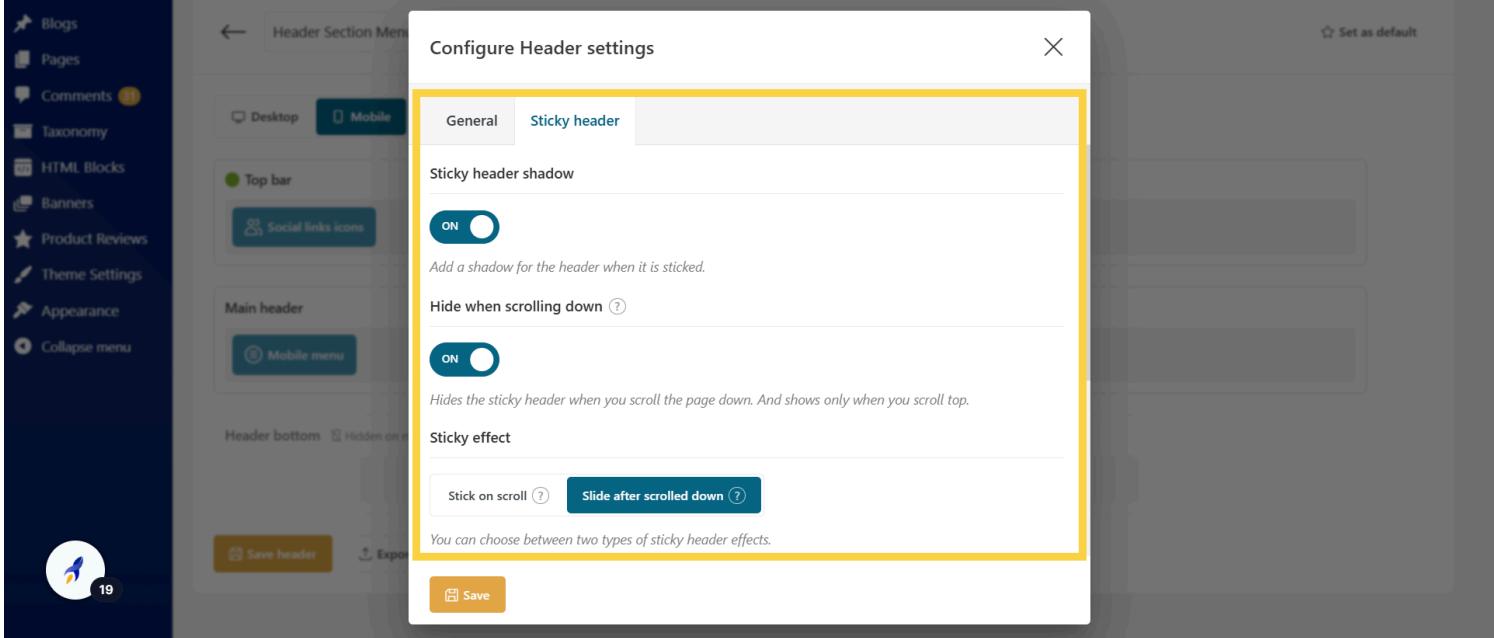

19. Allows the header to overlap the page content for a layered effect.

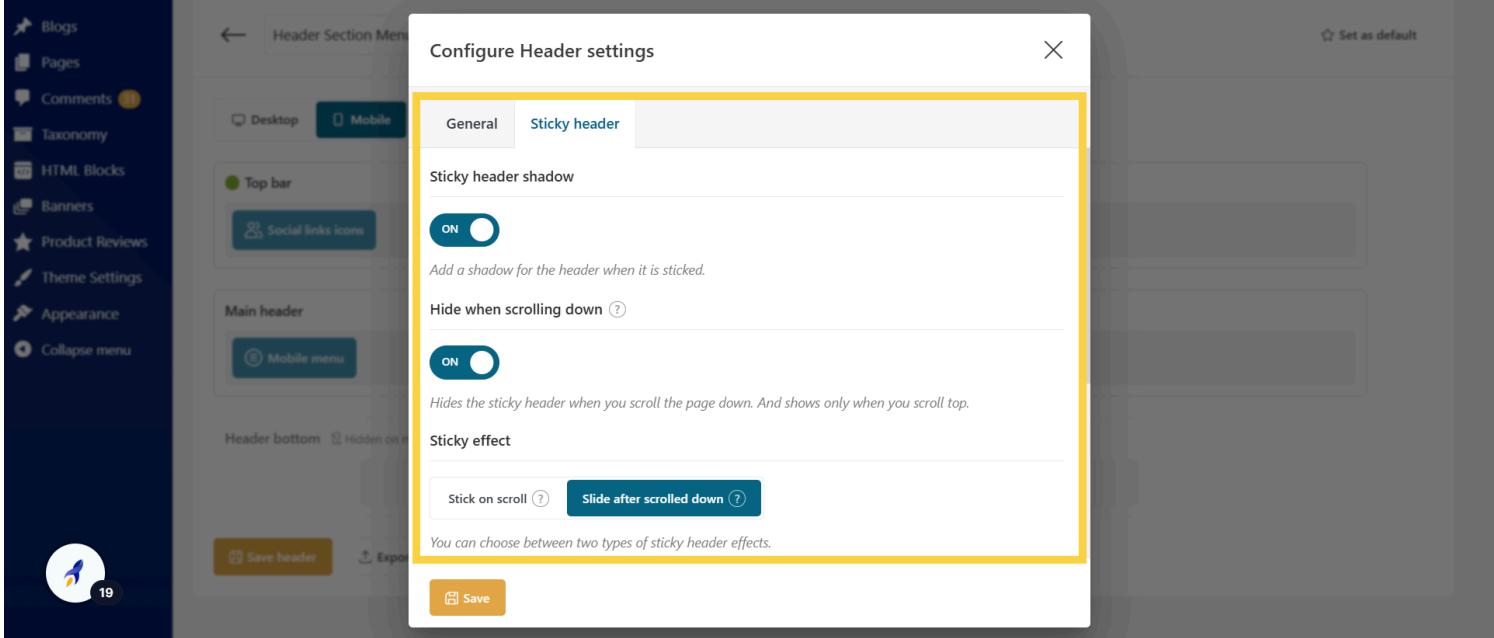

20. Let's move to the "Sticky Header" settings.

21. Adds a shadow effect to the header when it becomes sticky.

22. Adds a shadow effect to the header when it becomes sticky.

23.Duplicates elements like the logo, menu, search, and cart widget into the sticky header and displays them in a single line.

The screenshot shows the 'Configure Header settings' dialog box. On the left, there's a sidebar with icons for Blogs, Pages, Comments (11), Taxonomy, HTML Blocks, Banners, Product Reviews, Theme Settings, Appearance, and Collapse menu. A user icon with the number '20' is also present. The main area has tabs for General and Sticky header, with 'Sticky header' selected. It offers two options: 'Stick on scroll' and 'Slide after scrolled down'. Below this, a note says 'You can choose between two types of sticky header effects.' A yellow box highlights the 'Sticky header clone' section, which contains an 'ON' toggle switch (which is turned on) and a note: 'Sticky header will clone elements from the header (logo, menu, search and shopping cart widget) and show them in one line.' Another yellow box highlights the 'Sticky header height' section, which includes a slider set to 60 pixels. At the bottom are 'Save header' and 'Save' buttons.
